Written from the unique perspective of a fast jet cockpit, Tornado Over the Tigris captures the essence of what it was really like to fly a Tornado at the front-line of the Cold War in Germany and on operations over Iraq in the aftermath of the Gulf War. After achieving a boyhood ambition to qualify as an RAF pilot, Michael Napier was posted to RAF Bruggen in Germany where he spent five years flying Tornado GR1 strike/attack aircraft at the height of the Cold War. Always exhilarating, sometimes amusing and often dangerous, Michael Napier's Tornado flying ranged from 'routine' low-flying in continental Europe and the UK, to air combat manoeuvring in Sardinia and the ultra-realistic Red Flag exercises in the USA. Progressing from struggling first-tourist to respected four-ship leader, he then became an instructor at the Tactical Weapons Unit at RAF Chivenor. This tour, during which he flew the Hawk, provided yet more exciting and challenging flying. He returned to the Tornado at Bruggen as a Flight Commander shortly after the Gulf War and subsequently flew a number of operational sorties over Iraq, which included leading air-strikes against Iraqi air defence installations as part of major Coalition operations. This is his story, told with ease and great style. It is sure to inspire a fresh generation of fast jet pilots as they strive to make their own marks in this field.

A comprehensive account of the World War II Allied bombing campaign to destroy pivotal Romanian oil refineries—by the retired Marine Corps fighter pilot. Unlike previous books on Ploesti, Jay Stout goes well beyond the famous big and bloody raid of August 1943 and depicts the entire 1944 strategic campaign of twenty-plus missions that all but knocked Ploesti out of the war and denied the German war machine the fuel and lubricants it so desperately needed. Stout's account is also a launching point for the author's inquiries into many aspects of the American strategic bombing effort in World War II. It delivers across the board. Stout, who served as a Marine F/A-18 pilot in the First Gulf War, asks questions about aviation combat history and technique that any modern combat pilot would be dying to ask. He carries the ball far beyond the goal post set by all other Ploesti historians. He has gone out of his way to describe the defenses throughout the campaign, and he brings in the voices of Ploesti's defenders to complement the tales of Allied airmen who brought Ploesti to ruin. He describes the role of the bombers, as well as that of the fighters, the anti-aircraft defenses, even the technique of obscuring the Ploesti complex with smoke. Stout's lucid presentation of complex issues at the tactical and strategic levels makes his narrative "a must for those with a special interest in the attacks on Ploesti" (World War II History Magazine).

Winner of the 2012 Colby Award and the first Afghanistan memoir ever to be written by a Marine Harrier pilot, A Nightmare ’ s Prayer portrays the realities of war in the twenty-first century, taking a unique and powerful perspective on combat in Afghanistan as told by a former enlisted man turned officer. Lt. Col. Michael “ Zak ” Franzak was an AV-8B Marine Corps Harrier pilot who served as executive officer of VMA-513, “ The Flying Nightmares, ” while deployed in Afghanistan from 2002 to 2003. The squadron was the first to base Harriers in Bagram in support of Operation Enduring Freedom. But what should have been a standard six-month deployment soon turned to a yearlong ordeal as the Iraq conflict intensified. And in what appeared to be a forgotten war half a world away from home, Franzak and his colleagues struggled to stay motivated and do their job providing air cover to soldiers patrolling the inhospitable terrain. I wasn ’ t in a foxhole. I was above it. I was safe and comfortable in my sheltered cocoon 20,000 feet over the Hindu Kush. But I prayed. I prayed when I heard the muted cries of men who at last understood their fate. Franzak ’ s personal narrative captures the day-by-day details of his deployment, from family good-byes on departure day to the squadron ’ s return home. He explains the role the Harrier played over the Afghanistan battlefields and chronicles the life of an attack pilot—from the challenges of nighttime, weather, and the austere mountain environment to the frustrations of working under higher command whose micromanagement often exacerbated difficulties. In vivid and poignant passages, he delivers the full impact of enemy ambushes, the violence of combat, and the heartbreaking aftermath. And as the Iraq War unfolded, Franzak became embroiled in another battle: one within himself. Plagued with doubts and wrestling with his ego and his belief in God, he discovered in himself a man he loathed. But the hardest test of his lifetime and career was still to come—one that would change him forever. A stunning true account of service and sacrifice that takes the reader from the harrowing dangers of the cockpit to the secret, interior spiritual struggle facing a man trained for combat, A Nightmare ’ s Prayer brings to life a Marine ’ s public and personal trials set against “ the fine talcum brown soot of Afghanistan that permeated everything—even one ’ s soul. ”

Times of the Technoculture explores the social and cultural impact of new technologies, tracing the origins of the information society from the coming of the machine with the industrial revolution to the development of mass production techniques in the early twentieth century. The authors look at how the military has controlled the development of the information society, and consider the centrality of education in government attempts to create a knowledge society. Engaging in contemporary debates surrounding the internet, Robins and Webster question whether it can really offer us a new world of virtual communities, and suggest more radical alternatives to the corporate agenda of contemporary technologies.

The true story of World War 2 ’ s legendary Hell ’ s Angels—the 8th Air Force ’ s 303rd Bomb Group. Although the United States declared war against Germany in December 1941, a successful assault on Nazi-occupied Europe could not happen until Germany ’ s industrial and military might were crippled. The first target was the Luftwaffe—the most powerful and battle-hardened air force in the world. The United States Army Air Forces joined with Great Britain ’ s already-engaged Royal Air Force to launch a strategic air campaign that ultimately brought the Luftwaffe to its knees. One of the standout units of this campaign was the legendary 303rd Bomb Group—Hell ’ s Angels. This is the 303rd ’ s story, as told by the men who made it what it was. Taking their name from their B-17 of the same name, they became one of the most distinguished and important air combat units in history. The dramatic and terrible air battles they fought against Germany ultimately changed the course of the war. INCLUDES PHOTOS

Liberating Kuwait BRILL
The nearly half-million American aircrewmembers who served during World War II have almost disappeared. And so have their stories. Award-winning writer and former fighter pilot Jay A. Stout uses Unsung Eagles to save an exciting collection of those accounts from oblivion. These are not rehashed tales from the hoary icons of the war. Rather, they are stories from the masses of largely unrecognized men who—in the aggregate—actually won it. They are the recollections of your Uncle Frank who shared them only after having enjoyed a beer or nine, and of your old girlfriend ’ s grandfather who passed away about the same time she dumped you. And of the craggy guy who ran the town ’ s salvage yard; a dusty, fly-specked B-24 model hung over the counter. These are “ everyman ” accounts that are important but fast disappearing. Ray Crandall describes how he was nearly knocked into the Pacific by a heavy cruiser ’ s main battery during the Second Battle of the Philippine Sea. Jesse Barker—a displaced dive-bomber pilot—tells of dodging naval bombardments in the stinking mud of Guadalcanal. Bob Popeney relates how his friend and fellow A-20 pilot was blown out of formation by German anti-aircraft fire: “ I could see the inside of the airplane—and I could see Nordstrom's eyes. He looked confused...and then immediately he flipped up and went tumbling down. ” The combat careers of 22 different pilots from all the services are captured in this crisply written book which captivates the reader not only as an engaging oral history, but also puts personal context into the great air battles of World War II. Lt. Colonel (Ret.) Jay Stout is a former Marine Corps fighter pilot who flew F-4 Phantoms and F/A-18 Hornets during a military career from 1981 to 2001. A graduate of Purdue University, he has also written FORTRESS PLOESTI, FIGHTER GROUP and THE MEN WHO KILLED THE LUFTWAFFE .

Henry is a middle-aged science writer whose infatuation with the cosmos gets in the way of his love life. He ’ s researching the most compelling mystery of the universe when he meets Isabel, a bright attorney with captivating eyes. For Henry, who ’ s been romantically struggling for years, it ’ s love at first sight. Isabel is not so quickly convinced, well aware of her own baggage. Her daughter, Lauren, is a stunning, smart, and intuitive twenty-one year-old with issues—most notably, her addiction to opiates and alcohol. Lauren ’ s been to hell and back, taking her mom with her most of the way. She ’ s got one last chance before Isabel cuts her off for good. These three personalities become strangely entwined in a poignant, uplifting, funny, and fascinating, yet unexpected journey. The Long Desert Road takes Henry, Isabel, and Lauren to unfamiliar places: lifeless valleys, alien plateaus, and the tops of lofty peaks, from which their lives appear altogether different. It ’ s a gripping story about addictions and the universe, faith and suffering, courage and fear, truth and deception, death and love.

The significance of the Persian Gulf to international peace and security and to the global energy market cannot be overstated. Events such as the attacks of September 11 and the rise in energy demand and prices have only highlighted the importance of stability in the Gulf to the health of the global economy. This book demonstrates that the nature of military and political threats in the Gulf states (Bahrain, Saudi Arabia, Iran, Iraq, Qatar, Yemen, and the UAE) has shifted during the past three years. Although the threat from Saddam Hussein's Iraq, which produced three recent, major conventional wars-Iran-Iraq (1980-88), Persian Gulf (1990), and Iraq (2003)-has largely disappeared, it has been replaced by concerns over the asymmetric warfare conducted by terrorist organizations and over the proliferation of WMDs by both states and terrorists. These developments are affecting the defense planning and strategic posture of each country, and this book analyzes developments in the force structures of the Gulf states and their ability to deal with this shift in the nature of threat. The military and security forces of the Gulf states must evolve to adapt to the changing nature of the threat and take into account the risk of the Iraqi insurgency and the uncertainty surrounding Iraq's future. The key areas covered in this book include the internal terrorist threat to Saudi Arabia and the Gulf states; the impact of Iran's nuclear program and the risk it poses to energy and internal security in the Gulf area; and border disputes within the region that could develop

into conflict. In addition, the book studies the impact of the Iraq War on regional security and the fear of the insurgency spilling over into neighboring states. Cordesman and Al-Rodhan demonstrate a shift toward using internal security services to deal with the threat of extremism and asymmetric warfare. They also suggest that high energy prices and export revenues provide the Gulf countries the opportunity to upgrade their military forces and deal with their undercapitalization as a result of low oil prices in the 1990s. Moreover, they insist that the future of Iraq, the strategic and nuclear posture of Iran, and the terrorist threat will remain major risks and uncertainties in the short to medium run.

“ A superb, edge-of-the-seat account of [Elwyn] Righetti ’ s stellar combat career during the final months of the air war against Germany ” (Eric Hammel, author of Two Flags over Iwo Jima). A hell-bent-for-leather fighter pilot, Elwyn G. Righetti remains one of the most unknown, yet most compelling, colorful and controversial commanders of World War II. Arriving late to the war, he led the England-based 55th Fighter Group against the Nazis during the closing months of the fight with a no-holds-barred aggressiveness that transformed the group from a middling organization of no reputation into a headline-grabbing team that made excuses to no one. Indeed, Righetti ’ s boldness paid off, as he quickly achieved ace status and scored more strafing victories—twenty-seven—than any other Eighth Air Force pilot. Ultimately, Righetti ’ s calculated recklessness ran full speed into the odds. His aircraft was hit while strafing an enemy airfield only four days before the 55th flew its last mission. Almost farcically aggressive to the end, he coaxed his crippled fighter through one more firing pass before making a successful crash landing. Immediately, he radioed his men that he was fine and asked that they reassure his family. Righetti was never heard from again. Vanished Hero tells a story “ worthy of a Hollywood blockbuster . . . It is a fitting tribute to both Righetti and the man who collected his life ’ s journey ” (Military Heritage). “ An excellent biography of a true American hero . . . a worthy contribution to an understanding of the application of air power in the Second World War. ” —History News Network

U.s. Marines in the Gulf War, 1990-1991 Penguin

Now in its third edition, The American Culture of War presents a sweeping critical examination of every major American war since 1941: World War II, Korea, Vietnam, the First and Second Persian Gulf Wars, U.S. operations in Iraq and Afghanistan, and the war against ISIS. As he carefully considers the cultural forces that surrounded each military engagement, Adrian Lewis offers an original and provocative look at the motives, people and governments used to wage war, the discord among military personnel, the flawed political policies that guided military strategy, and the civilian perceptions that characterized each conflict. This third edition features: A new structure focused more exclusively on the character and conduct of the wars themselves Updates to account for the latest, evolving scholarship on these conflicts An updated account of American military involvement in the Middle East, including the abrupt rise of ISIS The new edition of The American Culture of War remains a comprehensive and essential resource for any student of American wartime conduct.

The F/A-18 Hornet has been in service over 20 years and has developed into and effective multi-role combat aircraft. With its array of weapon options the Hornet is capable of engaging targets on land, sea, and in the air and its ability to "swing-role" from one target type to another is impressive. The aircraft is in service with a number of air arms worldwide in both carrier-based and land-based variants.
