Named "Christian" to avoid hassles (some things never change), this is the most famous, the most celebrated astrology book in the English language. It has been prized by students ever since its first publication in 1647. The Horary Astrology in these pages, in the hands of a master, is no mere parlour game. Into his studio came the rich and poor, nobles and commoners, with problems great and small. This new edition restores Lilly's original page layouts, with marginalia. Modern spelling throughout, this edition includes Lilly's bibliography, his original index & a new glossary. Also includes his original woodblock charts, and their modern versions. This is Lilly's great work as he himself knew it. In this volume: Book 1, An Introduction to Astrology, containing the use of an ephemeris; the erecting of a scheme of heaven; nature of the twelve signs of the Zodiac, of the planets; with a most easy introduction to the whole art of astrology. This classic astrology text, revered by beginners and professional astrologers alike, is now available in a Weiser Classics edition. "The most important single contribution of twentieth-century astrology is that astrology is not a map of one's fixed destiny but is a potential map of the unfolding of the authentic, higher self." —Robert Hand, from the foreword Saturn's darker persona is recognized universally in myth and fairytale. In this classic astrology text, renowned astrologer and Jungian analyst Liz Greene offers a fresh perspective on how to handle the influence of this much-maligned astrological symbol. In Saturn, Greene shows us how the frustrating experiences connected to this planet can be turned into opportunities for greater insight and meaning in our lives. Saturn, she says, symbolizes a psychic process—one that allows us to utilize the experience of pain for self-discovery and a more fulfilling and complete life. Greene retraces Saturn's character through sign, house, aspect, and synastry in

a brilliant analysis that reveals his other face: that of the initiator who, for the price of our honesty with ourselves, offers us greater consciousness, self-understanding, and, eventually, freedom.

Thousands of years ago, people first observed a correlation between the heavenly bodies and events on Earth. Out of these early observations and subsequent refinements came what today is known as astrology. For most of these millennia, astrologers used only the seven visible planets: Sun, Moon, Mercury, Venus, Mars, Jupiter and Saturn. It is out of this tradition that Helena Avelar and Luis Ribeiro have written this extensive book on astrology. The rules and principles here presented apply to all branches of astrology: natal, mundane, horary and elective. Their method is the traditional and time-honored one, and includes, among others, chapters on: The Planets The Zodiac and the Signs The Essential Dignities The Houses The Aspects Chart Dynamics The Condition of the Planets The Fixed Stars The Parts The Power of the Planets Using this traditional method, it is possible not only to thoroughly and completely read the natal chart but to do so with a breadth and depth of meaning not found in the modern methods of astrological interpretation. It avoids cookbook-type methods and centers on the practical understanding of the astrological concepts, presenting the Tradition in present-day language. In addition, more than two hundred fifty illustrations make the traditional principles easy to understand and use in chart interpretation. This practical how-to book is one of a kind, and the one that will teach you the traditional methods and you reach into the past to benefit from the knowledge of the authors and astrologers from ancient Babylonia through the medieval period. It is suitable for both beginners and advanced students, as it provides the indispensable core of astrological knowledge, at the same time allowing more experienced students to organize their knowledge into a coherent system.

For the first time, in Planets in Youth, a major astrologer looks at children and childhood. Robert Hand, one of the leading proponents of the psychological approach to astrology, in his definition of childhood, says, "What the child appears to be as a child is not very important. It may be fascinating to have an astrologer correctly describe a child's apparent personality, but it is not useful. It is much more important to view the child as a developing adult, to consider the kind of adult likely to arise out of the child's apparent personality... Many persons whose childhoods were miserable have ultimately been very happy and self-fulfilled. The reverse is also true, and every other combination of miserable or happy childhood and adulthood as well. The view of the child as an adult in the process of becoming is the orientation that this book takes." Parents will welcome this book and use it to help their children learn to cope with the complexities of modern life. Readers of all ages will use it to understand their own patterns of early development. The first four chapters define the roles of mother and father, explain the effects of various planetary energy systems and discuss the meaning of elements and crosses in a child's chart. Hand analyzes the charts of three children, including Judy Garland and Shirley Temple, to illustrate the astrological principles and psychological insights set forth in his intriguing study of personality development. The major part of the book consists of delineations of horoscope factors, written with young people in mind. Every planet in every sign, house and major aspect, as well as every rising sign, is interpreted in about three hundred words that stress possibilities rather than certainties. Book jacket.

Planets in Aspect Little, Brown

The inner planets--Mercury, Venus, Mars--are the foundations of what psychology calls the ego, the sense of personal self. In this fourth volume in the Seminars in Psychological Astrology series, Liz Greene and Howard Sasportas discuss the value of the inner planets as they symbolize important aspects of personality. We are not trained to give value to our private needs, feelings, and qualities. Indeed, because of their intensely personal nature, they are often suppressed or overlooked as irrelevant to society. Likewise, the inner planets have tended to be given less attention by psychological astrologers for they are the personal planets. The authors show us that in order to give the most that we can to our interactions with the rest of the world, we must first understand our own needs and have a healthy ego a personal authenticity. Their book teaches us the process of understanding how these three planets actually represent our individuality, and how they directly color the energy of the rest of our horoscope. Greene and Sasportas blend the processes of astrology and psychology in a unique and important way in this indepth insight into the archetypes represented by the inner planets.

Planets in Houses Red Feather

What Robert Pelletier does in Planets in Houses has never been done before in the history of astrology. He discusses the meaning of each planet in each house as derived by counting from each of the other eleven houses, and he discusses the meaning of each house position in relation to the other houses with

which it forms trines, sextiles, squares and oppositions, inconjuncts and semi-sextiles. In each chapter, wheel symbols graphically show the seventeen different house relationships delineated for each planet. Finally, Pelletier delineates the Sun-Moon polarities in terms of the wheel of houses: for each house position of the Sun, he interprets each of the twelve possible related house positions of the Moon. Each chapter presents the traditional meaning of the house and explains how the derivative house system applies to it.
