It was a long time ago and few alive now remember what life was like in England in the years after World War II. Yes, the Luftwaffe and Vengeance weapons had made a fine mess in the south of the country, but during the war years the Yanks were there, millions of them, seducing the womenfolk, brawling in pubs, and, most importantly, spending their pay with local shopkeepers. May, 1945, the war ended and all the Americans left. Most went home, but a sizeable contingent set up shop in Germany, where, to the best of their ability given the local ruins, they carried on as

before, seducing the womenfolk, brawling in pubs and spending their pay with the surviving shopkeepers. The Americans were joined by contingents of English, French and Soviet troops. As a result, the surprising fact, long forgotten, is that after the war, conditions in England were even worse than they were in post-Third Reich Germany. Some in Britain rued winning the war, as deprivation became their fate. In London after the war books were so scarce that used vendors had long lists of people waiting for the few books that turned up. For schools in London which taught astrology, the situation was impossible. Responding to the post WWII book shortage, Margaret Hone published this ultimate Astrology Text-Book. She was born in Birmingham, England, on October 2, 1892, at 2:13 am. Her ascendant was 27 Leo; her Sun was 9 Libra; her Moon was 13 Aquarius. Her midheaven was 15 Taurus.

Of Ms Hone, James Holden wrote, "English astrologer, educator, and author. She was a professional astrologer and private teacher for many years and later was Principal and Director of Studies of the Faculty of Astrological Studies 1954-1969 and Vice President of the Astrological Lodge of London. Mrs. Hone was an advocate of the Equal House system of house division. She is best known in the U.S. for her two instruction manuals." This book is dedicated to Charles E.O. Carter, 1887-1968. Carter succeeded Alan Leo as head of the Astrological Lodge (1920-1952) and was First Principal of the Faculty of Astrological Studies, which he helped found in 1948. Hone succeeded Carter at FAS. She passed away on October 14, 1969. In his Preface, while quick to praise Hone, a personal friend, Charles Carter also pointed out that this book's high price was justified, that "padding has been

rigorously excluded." He goes on to praise the workmanship, the carefully worded definitions, as well as the fact that the book was complete and entire in itself. Save for ephemeris and tables of houses, this one book would suffice beginning as well as advanced students for some years. In addition, Hone also includes one of the earliest modern histories of astrology, short biographies of leading astrologers past and present, astrology and public opinion (daily horoscopes in the newspapers were a recent innovation). On a more practical side, Hone gives a thorough analysis of the principal house systems of the day (Equal, Campanus, Regiomontanus, Placidus), and even mentions C.G. Jung's recently developed Depth Psychology.

The Zodiac by Degrees provides symbols and interpretations for each of the 360 degrees of the zodiac. These symbols make a direct connection with your basic spiritual energies and penetrate the private language of your personal mythology. For this second edition, every one of the 360 degrees has been reexamined from extensive lists of examples. In the end, about ninety degrees have undergone major changes and all of the rest have been clarified and sharpened. The result is a symbol system of unparalleled accuracy, and an indispensable tool for both amateur and practicing astrologers. The Zodiac by Degrees gave me serious goose bumps on several occasions. Inside of half an hour, the text had cleared up my ambivalence about the exact degree of my Ascendant and given me a new understanding of my Sun degree #8212one vastly more evocative than the traditional Sabian interpretation. Martin Goldsmith is a poet in the old sense of the word: he's on fire with imagery and the fire is contagious." #8212Steven Forrest, author of The Inner Sky "At last! An astrologer who

has undertaken the huge workload of intensive research into the individual degrees of the zodiac. Thanks to his years of work, Goldsmith has finally taken this area of astrology out of the misty, intuitive, 'channeled' area of the Sabian symbols onto the firmer and more reliable footing of good, grounded research. This long-needed book is therefore an essential reference work for any serious astrologer."

The winner of the Man Booker Prize, this "expertly written, perfectly constructed" bestseller (The Guardian) is now a Starz miniseries. It is 1866, and Walter Moody has come to stake his claim in New Zealand's booming gold rush. On the stormy night of his arrival, he stumbles across a tense gathering of 12 local

men who have met in secret to discuss a series of unexplained events: a wealthy man has vanished, a prostitute has tried to end her life, and an enormous cache of gold has been discovered in the home of a luckless drunk. Moody is soon drawn into a network of fates and fortunes that is as complex and exquisitely ornate as the night sky. Richly evoking a mid-nineteenth-century world of shipping, banking, and gold rush boom and bust, *The Luminaries* is at once a fiendishly clever ghost story, a gripping page-turner, and a thrilling novelistic achievement. It richly confirms that Eleanor Catton is one of the brightest stars in the international literary firmament. *Planets in Composite* Schiffer Pub Limited A penetrating astrological reading... how does the astrologer do it? Thousands of years ago, people first observed a correlation between the heavenly bodies and events on Earth. Out of these early observations and subsequent refinements came what today is known as astrology. For most of these millennia, astrologers used only the seven visible planets: Sun, Moon, Mercury, Venus, Mars, Jupiter and Saturn. It is out of this tradition that Helena Avelar and Luis Ribeiro have written this extensive book on astrology. The rules and principles here presented apply to all branches of astrology: natal, mundane, horary and elective. Their method is the traditional and time-honored one, and includes, among others, chapters on: The Planets The Zodiac and the Signs The Essential

Earth and Air Simon and Schuster
Degrees of the Zodiac was written by noted astrologer Esther V. Leinbach and originally published by Macoy Publishing Company in 1973. This Revised Edition from the author's son, Kevin Leinbach, has been updated for the new Millennium, using the Author's original source material and research. Popular Astrology takes into consideration only one factor: the location of the Sun in the Zodiac, the Sun Sign.

Even some astrologers only consider the twelve signs of the Zodiac and disregard the individual 30 degrees that make up the total span of the sign. But the degrees are a very significant influence in the chart and more and more astrologers are discovering how important degrees are to horoscope interpretation. The 360 Degrees in the circle of the Zodiac are activated by the Sun, the Moon and the Planets, even the house cusps of every horoscope. These degrees help to account for the many different expressions of each individual sign. Degree influences have often been seen as ethereal and mysterious, relying on symbolism to suggest potential expressions. Perhaps the advantage of symbols is that they can be interpreted in the current context directly. But symbols can also be quite difficult to decipher. This book was originally written to bring the symbolism into a descriptive, practically applicable format that can more easily be used in chart interpretation. The approach is psychological rather

than symbolic. It was intended to be accessible to the novice as well as the professional astrologer. But when particular references are made to current insights or methods, there is some danger that degree descriptions can become outdated. This Revised Edition has been released to update the descriptions with a current perspective and incorporate a context and evolutionary perspective that was simply not in place when Degrees of the Zodiac was originally published.

This book covers complete delineations of all the major transits - conjunction, sextile, square, trine and opposition - that occur between transiting Sun, Moon and all planets to each planet in the natal chart and the Ascendant and Midheaven, as well as complete delineations of each planet transiting each house of the natal chart. These 720 lucid delineations are full of insight for both

the professional astrologer and the beginner.

What Robert Pelletier does in *Planets in Houses* has never been done before in the history of astrology. He discusses the meaning of each planet in each house as derived by counting from each of the other eleven houses, and he discusses the meaning of each house position in relation to the other houses with which it forms trines, sextiles, squares and oppositions, inconjuncts and semi-sextiles. In each chapter, wheel symbols graphically show the seventeen different house relationships delineated for each planet. Finally, Pelletier delineates the Sun-Moon polarities in

terms of the wheel of houses: for each house position of the Sun, he interprets each of the twelve possible related house positions of the Moon. Each chapter presents the traditional meaning of the house and explains how the derivative house system applies to it.

The inner planets--Mercury, Venus, Mars--are the foundations of what psychology calls the ego, the sense of personal self. In this fourth volume in the *Seminars in Psychological Astrology* series, Liz Greene and Howard Sasportas discuss the value of the inner planets as they symbolize important aspects of personality. We are not trained to give value to our private needs, feelings, and qualities. Indeed, because of their intensely personal nature, they are often suppressed or overlooked as irrelevant to society.

Likewise, the inner planets have tended to be given less attention by psychological astrologers for they are the personal planets. The authors show us that in order to give the most that we can to our interactions with the rest of the world, we must first understand our own needs and have a healthy ego a personal authenticity. Their book teaches us the process of understanding how these three planets actually represent our individuality, and how they directly color the energy of the rest of our horoscope. Greene and Sasportas blend the processes of astrology and psychology in a unique and important way in this in-depth insight into the archetypes represented by the inner planets. *Essays on Astrology* Spring Publications

This volume, a directory of astrological correspondences, is the result of a research project that drew together the thoughts of many others into a reference book, assuming the role of a dictionary to astrologers, but

vastly more complete. It is the only place where all sign, planetary and house rulerships have been brought together and put in a good workable order. It is organized in such a way that one can use the book for quick and easy reference, and it eliminates the need to search through various other volumes. In four parts: an alphabetical listing, a listing by planets, a listing by signs, a listing by houses. Plus an Appendix with special listings: principal bones of the body, principal veins of the body, chart of an organization, flavors and handwriting forms. Enthusiastically endorsed and used by professionals and students alike, no reference library is complete without this best-selling volume. *Christian Astrology* Raven Dreams Press Thousands of readers worldwide have found personal meaning in Arroyo's bestselling books. Here, he shows how to develop reliable, in-depth interpretations for any birth chart. The Only Astrology Book You'll Ever Need Avon Books Jung on Astrology brings together C. G. Jung's thoughts on astrology in a single volume for the first time, significantly adding to our understanding of Jung's work. Jung's Collected Works, seminars, and letters contain numerous discussions of this ancient divinatory system, and Jung himself used astrological horoscopes as a diagnostic tool in his analytic practice. Understood in terms of his own psychology as a symbolic representation of the archetypes of the collective unconscious, Jung found in astrology a wealth of spiritual and psychological meaning and suggested it represents the "sum of all the psychological knowledge of antiquity." The selections and editorial introductions by Safron Rossi and Keiron Le Grice address topics that were of critical importance to Jung—such as the archetypal symbolism in astrology, the precession of the equinoxes and astrological ages, astrology as a form of synchronicity and acausal correspondence, the qualitative nature of time, and the experience of astrological fate—allowing readers to assess astrology's place within the larger corpus of Jung's work and its value as a source of symbolic meaning for our time. The book will be of great interest to analytical

the collected
essays of the
world's leading
astrologer. In one
comprehensive
volume, *Essays on
Astrology* makes a
cross section of
Robert Hand's
writings available
to both the

beginning and advanced astrologer. Robert Hand is one of the few astrologers to successfully work and publish in both the technical and humanistic dimensions of astrology. Because of this, his work is read, reread and respected by all serious astrologers. And this book presents a comprehensive look at the various essays of this very important author. As a reference book, *Essays on Astrology* is an invaluable resource. Some articles written several years ago, such as *The Ascendant*, *Midheaven* and *Vertex in Extreme Latitudes*, have been extremely hard to find. Still others are printed here for the very first time making this not only a reprint of Robert Hand's previous works, but an

important addition to the study of astrology. *Jung on Astrology* American Federation of Astr Illustrates how aspects can offer a profound depiction of an individual and his or her destiny. • Contains comprehensive sections full of interpretations for every planetary combination. • Concepts are explained through the use of actual birth charts and diagrams. • A core textbook at the Faculty of Astrological Studies in London. Aspects are an essential piece of the astrological puzzle when it comes to interpreting and using the information that astrology can give us. It is not enough to know the placement of the planets on the horoscope. It is the relationships between the stars

and planets that let us grasp the destiny of the individual. Aspects describe the drama of our lives--the complex configurations that influence what will happen to us over time. Sue Tompkins, a fellow of the Faculty of Astrological Studies in London, shows how to interpret aspects when doing daily astrological readings. She uses the lives of real people to plot the aspects and offers examples of every possible planetary combination. Detailing the influence of oppositions, trines and elemental trines, and cardinal, mutable, and fixed crosses, Tompkins shows how aspects provide the energy in the chart that transforms the horoscope into something symbolizing an alive and vital human being. With
