From actress and math genius Danica McKellar comes a groundbreaking middle school math workbook for middle school girls, their parents, and educators. As the math education crisis in this country continues to make headlines, research continues to prove that it is in middle school when math scores begin to drop—especially for girls—in large part due to the relentless social conditioning that tells girls they “can’t do” math, and that math is “uncool.” Young girls today need strong female role

models to embrace the idea that it’s okay to be smart! It’s Danica McKellar’s mission to be this role model, and demonstrate on a large scale that math doesn’t suck. In this fun and accessible guide, McKellar—dubbed a “math superstar” by The New York Times—gives girls and their parents the tools they need to master the math concepts that confuse middle-schoolers most, including fractions, percentages, pre-algebra, and more. The book features hip, real-world examples, step-by-step instruction, and engaging stories of Danica’s own childhood struggles in math (and stardom). It even includes a Math Horoscope section, Math Personality Quizzes, and Real-Life Testimonials—ultimately revealing why math is easier and cooler than readers think.

Author Sara Marcus, a music and politics writer for Time Out New York, Slate.com, Pos, and Heeb magazine, interweaves research, interviews, and her own memories as a Riot Grrrl front-liner.
