### The Single-tier Pension

This paper outlines the Government's detailed proposition for state pension reform. It follows a consultation on the proposals set out in "A state pension of the 21st century" (2011, Cm. 8053, ISBN 9780101805322). There was consensus that the state pension system

---

needed to be simplified and the aim is to merge the state second pension with the basic state pension, to create one flat-rate payment. The new flat-rate state pension will start in April 2017 at the earliest. The weekly payment will be £ 144, plus inflation rises between now and 2017. Chapters in this paper cover: the context for reform; the single-tier pension; managing the end of contracting-out; the transition to the single-tier pension;

sustainability and assumptions; longer-term sustainability - state pension age. Annexes provide: a brief history of the state pension; faster flat rating - assessment against principles for reform; features of the single-tier pension and specific transitional arrangements; an example pension statement; proposed timetable for implementing the increase in state pension age to 67.
