A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down

for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys

in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. Math, Grade 3 Homework and Problem Solving Book Houghton Mifflin GO Math! offers an engaging and interactive approach to covering the Common Core State Standards. This Grade 3 student edition is organized into individual chapter booklets and comes with a student resource book.
