When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and Dissertations*—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released *Chicago Manual of Style*, 17th edition, as well as with the latest edition of *The Craft of Research*. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. *A Manual for Writers* also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and

millions of copies, *A Manual for Writers* has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines. The diversity of student populations in the United States presents educators with many challenges. To provide effective reading instruction for the individual student, teachers must understand the enormous variety of reading methods and materials that exist and make independent decisions based on their students' particular needs. Research indicates that educators are often influenced by reading instruction fads that quickly fade, making it more challenging to

develop a repertoire of teaching strategies in which a teacher may have confidence. This book examines a variety of reading methods used in American schools from the 19th to the 21st century, and the literature promoting or critiquing them, to help teachers become informed decision makers and better meet the needs of students.

Psychiatry is arguably the most misunderstood specialty in modern medicine and psychiatrists are often thought of as part physician, part confessor, part police officer, and part shaman. In *Demystifying Psychiatry*, two eminent psychiatrists offer an illuminating look at the entire field, offering a clear and informative portrait of a medical specialty often clouded in

myth. Zorumski and Rubin range from a basic discussion of what psychiatry is, to the types of illnesses psychiatrists treat, the training of psychiatrists, the treatment of psychiatric disorders (covering medications, psychotherapy, lifestyle interventions, electroconvulsive therapy, and much more), and how families can help with treatment. They caution the consumer about practices that should raise red flags. The book also covers new trends in psychiatry and explores the future of the field, predicting that major advances in genetics and neuroscience will lead to rapid and amazing changes in psychiatry. The book concludes with extensive reference materials that will be valuable both to general readers and medical practitioners.
