Pieter Hoff is the inventor of the Groasis Waterboxx. It was elected the `Best of Whats New 2010 by Popular Science, one of the most influential science magazines with over 3 million readers around the world. The Groasis Waterboxx beat 116 great products mostly from Fortune 500 companies; amongst them, the fantastic Apple iPad and the incredible Philips ledlamp. His innovation allows trees to be planted in deserts, on mountains, eroded areas, rocks and even in the ashes of burned forests. The invention brought him into the world of CO, which is explained to the reader in surprisingly easy to understand concepts. `The Treesolution clarifies how to solve the CO emission problem and turn it into a CO wealth creating opportunity.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-

level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that

---

highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and

apply--key concepts. Secret to Modern Woman's Heart (I and II) John Wiley & Sons

We need to play with media to become more effective communicators. This book was written to inspire and empower you, as a creative person, to expand your

personal senses of digital literacy and digital agency as a multimedia communicator. As you learn to play with digital text, images, audio and video, you will communicate more creatively and flexibly with a wider variety of options. Although written primarily for educators, anyone who is interested in learning more about digital communication will learn something new from this book. As children, we learn to progressively make sense of our confusing world through play. The same dynamics apply to us as adults communicating with new and different media forms.

Contentment is a super power. If you can learn the skills of contentment, your life will be better in so many ways: You ' ll

---

enjoy your life more. Your relationship will be stronger. You ' ll be better at meeting people. You ' ll be healthier, and good at forming healthy habits. You ' ll like and trust yourself more. You ' ll be jealous less. You ' ll be less angry and more at peace. You ' ll be happier with your body. You ' ll be happier no matter what you ' re doing or who you ' re with. Those are a lot of benefits, from one small bundle of skills. Putting some time in learning the skills of contentment is worth the effect and will pay off for the rest of your life.

“ Hans Rosling tells the story of ‘ the secret silent miracle of human progress ’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly. ”

—Melinda Gates

"Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying

opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world ’ s population live in poverty; why the world ’ s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical

---

new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- " This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a
