How do you keep your kids safe in a digital world? Maybe your kids are like so many others these days--too often glued to their smartphones, social media, and streaming entertainment--and you're worried. Or maybe you're wondering how to avoid digital overload. You definitely want your kids to use devices wisely...but how do you -teach them to do that? Many parents wonder: At what age should I buy my kid a phone? How long should I allow my kid to play video games each day? How can I keep my kids safe with the screens they already have? At what age should I allow my kids on social media? What if my teen insists on having their device in their bedroom at night? Parenting Generation Screen will not only equip you to set practical screen limits for your kids but also show you how to engage in meaningful conversations with your kids so they learn to be wise in the digital world. Jonathan's expert advice draws upon more than twenty years of working with teenagers and writing about the influence of digital media as well as his experiences in raising three kids (with plenty of devices!). An Introduction to Statistical Learning provides an accessible overview of the field of statistical learning, an essential toolset for making sense of the vast and complex data sets that have emerged in fields ranging from biology to finance to marketing to astrophysics in the past twenty years. This book presents some of the most important modeling and prediction techniques, along with relevant applications. Topics include linear regression, classification, resampling methods, shrinkage approaches, tree-based methods, support vector machines, clustering, and more. Color graphics and real-world examples are used to illustrate the methods presented. Since the goal of this textbook is to facilitate the use of these statistical learning techniques by practitioners in science, industry, and other fields, each chapter contains a tutorial on implementing the analyses and methods presented in R, an extremely popular open source statistical software platform. Two of the authors co-wrote *The Elements of Statistical Learning* (Hastie, Tibshirani and Friedman, 2nd edition 2009), a popular reference book for statistics and machine learning researchers. An Introduction to Statistical Learning covers many of the same topics, but at a level accessible to a much broader audience. This book is targeted at statisticians and non-statisticians alike who wish to use cutting-edge statistical learning techniques to analyze their data. The text assumes only a previous course in linear regression and no knowledge of matrix algebra.

This comprehensive volume provides state-of-the-art guidance on Quality of Service (QoS) and Quality of end-user Experience (QoE) management in UMTS cellular systems, tackling planning, provisioning, monitoring and optimisation issues in a single accessible resource. In addition, a detailed discussion is provided on service applications, QoS concept, architecture and functions in access, packet & circuit switched core and backbone networks. Defines and explains the differences between QoS and QoE, and end-to-end concept, based on the premise that it is the end-user who is the ultimate beneficiary of QoS. Covers QoS and QoE issues related to present and forthcoming service applications, including multimedia messaging service (MMS), Video Sharing (VS), content download, business connectivity, Push to talk over Cellular (PoC), Voice over IP (VoIP), presence, instant messaging, gaming, streaming and browsing. Presents QoS concepts and architecture as defined in 3GPP Releases 97/98, 99, 5, 6, and 7, and provides a comprehensive description of protocols and packet data transfer across WCDMA evolved and (E)GPRS networks. Discusses service driven radio network planning aspects for (E)GPRS and WCDMA. Includes three detailed chapters covering concepts, means and methods for QoS provisioning, QoS & QoE performance monitoring and optimisation. This book is aimed at operators, vendors, deployers, consultants and managers specialising in the research, development, implementation, marketing and sales of products and tools for QoS and QoE management in UMTS networks. It will also be of interest to postgraduate students and researchers in the field of telecommunications and specialising in UMTS QoS and QoE principles and practices.

The instant New York Times bestseller End the struggle, speak up for what you need, and experience the freedom of being truly yourself. Healthy boundaries. We all know we should have them--in order to achieve work/life balance, cope with toxic people, and enjoy rewarding relationships with partners, friends, and family. But what do "healthy boundaries" really mean--and how can we successfully express our needs, say "no," and be assertive without offending others? Licensed counselor, sought-after relationship expert, and one of the most influential therapists on Instagram Nedra Glover Tawwab demystifies this complex topic for today's world. In a relatable and inclusive tone, *Set Boundaries, Find Peace* presents simple-yet-powerful ways to establish healthy boundaries in all aspects of life. Rooted in the latest research and best practices used in cognitive behavioral therapy (CBT), these techniques help us identify and express our needs clearly and without apology--and unravel a root problem behind codependency, power struggles, anxiety, depression, burnout, and more.

An exploration of the terrifying threats to our world that fill today's headlines: from global warming epidemic to the threat of nuclear weapons and the risk posed by the leading edge devices like the Large Hadron Collider. Armageddon Science by Brian Clegg is everything you want to know about potential man-made disaster. Climate change. Nuclear devastation. Bio-hazards. The Large Hadron Collider. What do these things have in common? They all have the potential to end our world. Every great scientific creation of man is balanced by an equal amount of danger—as there's no progress without risk. Armageddon Science is an authoritative look at the real “mad science” at work today, that recklessly puts life on Earth at risk for the pursuit of knowledge and personal gain. This book explores the reality of the dangers that science poses to the human race, from the classic fear of nuclear destruction to the latest possibilities for annihilation. Combining the science behind those threats with an understanding of the real people responsible as well as providing an assessment of the likelihood of the end of the world, this isn't a disaster movie, it's Armageddon Science.

#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

The Life You Can Save John Wiley & Sons

This report warns that the extraordinary success of the UK's creative industries may be jeopardised by any dilution of intellectual property rights and the failure to tackle online piracy. The Committee also strongly condemns the failure of Google in particular to tackle access of copyright infringing websites through its search engine. Such illegal piracy, combined with proposals arising from the Hargreaves review to introduce copyright exceptions, and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010, together threaten the livelihoods of the individuals and industries that contribute over £36 billion annually to the UK economy. Also, the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy. The Committee calls for: a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property; the maximum penalty for serious online IP theft to be increased to 10 years imprisonment, in line with the punishment for such offences in the physical world; more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied; redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible; reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work; greater recognition of the importance of arts subjects in the curriculum.

ORCHESTRATED DEATH Middle-class, middle-aged and, according to his partner, menopausal, Detective Inspector Bill Slider is never going to make it to the Yard. Passed over for promotion again, the last thing he needs in his life, or on his patch, is an unidentifiable, naked female corpse. A priceless Stradivarius and a giant tin of olive oil are the only clues in an investigation that takes the steely-eyed, furry-headed detective all the way from the exotic backstreets of Shepherd's Bush to far-flung Birmingham. DEATH WATCH When a noted womaniser dies in mysterious circumstances in a sleazy motel and the whole of his murky past comes to light, DI Bill Slider begins to question more than whether the game is worth the candle. Right is right, and indivisible. As soon as he's solved the motel mystery, and found out

what the Neary boys and Gorgeous George are up to, Slider's going to have to start putting his own house in orders ... NECROCHIP Detective Superintendent 'George' Dickson's replacement by DS 'Mad Ivan' Barrington - a new broom determined to sweep clean - is all par for the course for DI Bill Slider, as he faces the unhygienic fact of a dismembered corpse in a catering establishment. But there are still niggling questions to distract him: why didn't Barrington like Dickson? What is the mystery of the stake-out they once did together? And why is Slider's home life in almost perpetual stride?
