The Speed of Souls is the heart-warming, often hilarious, often outrageous, journey of Hugo (a dog who dies and comes back as a cat), Cassie (an aging rescue dog coming to terms with her own mortality), and Jerry (a once popular sci-fi writer in the midst of a cataclysmic mid-life crisis). Hugo was a dog. He died. Now he's a kitten. As Hugo adjusts to his new body (not just a cat--a baby cat!), his new home (San Francisco), his new outside (Where are the mountains? Where is the lake?), and his sudden urge to sit in every box he sees, he wonders if he'll ever see Cassie or Jerry again. Back in Lake Tahoe, Cassie and Jerry attempt to come to grips with life without Hugo. Cassie fills the void with "Tadpole Guard", "Worm Patrol", and ups her protection of Jerry (her human), who is in the midst of a cataclysmic midlife crisis. In addition to his dog dying, Jerry's last two books have been monumental flops and he's still reeling from his fiancée leaving him for another man. As if these problems aren't enough, his parents (who have become late-stage hippies) are coming to live with him for the entire summer. And so begins the journey of three souls, intertwined by loss, love, and perhaps something even greater. Told with Nick Pirog's charm and razor sharp wit, The Speed of Souls is at once a hilarious, moving, and transcendent work of storytelling

Searching for a needle in a haystack is an important task in several contexts of data analysis and decision-making. Examples include identifying the insider threat within an organization, the prediction of failure in industrial production, or pinpointing the unique signature of a solo perpetrator, such as a school shooter or a lone wolf terrorist. It is a challenge different from that of identifying a rare event (e.g., a tsunami) or detecting anomalies because the "needle" is not easily distinguished from the haystack. This challenging context is imbued with particular difficulties, from the lack of sufficient data to train a machine learning model through the identification of the relevant features and up to the painful price of false alarms, which might cause us to question the relevance of machine learning solutions even if they perform well according to common performance criteria. In this book, Prof. Neuman approaches the problem of finding the needle by specifically focusing on the human factor, from solo perpetrators to insider threats. Providing for the first time a deep, critical, multidimensional, and methodological analysis of the challenge, the book offers data scientists and decision makers a deep scientific foundational approach combined with a pragmatic practical approach that may guide them in searching for a needle in a haystack.

He swore he wouldn't touch her, but she's about to test his restraint. Prim and proper secretary Melodie Turner has been in lust for her boss for years . . . and she's finally going to do something about it. P.I. Cole Sommers might be able to barely resist her sexy new attitude and flirtatious behavior, but when she takes a cue from his current case and decides to seduce Cole's mind with highly provocative letters, she knows his body won't be very far behind . . . Cole is definitely in over his head. He's got more cases than he can handle, but all he can think about is taking his secretary to bed, turning her over his knee, and showing her what happens to naughty girls who don't behave. At every turn, Melodie is there, taunting him, teasing him, making him burn with a deep, undeniable need. But Cole promised her father that he'd protect her—even from himself—which means she's off-limits. Only he hadn't counted on being the target of Melodie's irresistible sensual assaults. Nor had he planned to lose his hardened heart in the battle . . .

Some people meditate because they want to attain to enlightenment but all most people really want is to reduce their stress levels and bring more confidence, love and happiness into their life. This book will give you a thorough grounding in how to meditate. You will learn how to witness; how to watch the breath; how to run an awareness continuum; how to silence the internal dialogue and enter no mind states. The information is carefully sequenced to make it easy for a beginner to grasp the concepts and also provides techniques to guide the experienced meditator in their exploration of consciousness. My intention in creating this publication has been to transform age old spiritual practises by drawing upon the more recent body of knowledge from the fields of hypnosis and NLP, to create new procedures, applications, aesthetics, insights and understandings. The reader is encouraged to use this publication to make their own personal discoveries, based upon existential experience rather than knowledge. Abby Eagle

"I eagerly commend this series." -R. Albert Mohler Jr., President, The Southern Baptist Theological Seminary Many new believers have questions about what it means to live as a Christian in the context of a local church, and pastors are looking for resources to pass along to their congregations to help them think biblically about the Christian life. Church Questions is a series by 9Marks that seeks to provide Christians with sound and accessible biblical teaching by answering common questions about church life. Each booklet offers biblical answers and practical applications with the goal of nurturing healthy church practice and commitment. Discipleship is an important part of the Christian life. As we follow Jesus, we learn the importance of pointing unbelievers to Jesus and helping believers grow in their relationship with him. But how do you know where to start? In this addition to the Church Questions series, Garrett Kell explores the Bible's teaching on discipleship and how that plays out practically in the context of the local church.

The history of particle physics, the hunt for the most elusive particle, and the fundamental questions the search has inspired How did physicists combine talent and technology to discover the Higgs boson, the last piece in our inventory of the subatomic world? How did the Higgs change our understanding of the universe? And now, nearly a decade after its detection, what comes next? Answering these questions, Ivo van Vulpen—a CERN particle physicist and member of the team behind the detection—invites us on a journey to the frontiers of our knowledge. Enjoy van Vulpen's accessible explanation of the history of particle physics and of concepts like quantum mechanics and relativity—and ponder his inquiries regarding the search for new particles (to explain dark matter), a new force (to combine the existing fundamental forces), and new phenomena (undiscovered dimensions of space). This is a lively account of work at the world's highest-energy particle accelerator, with inspiring personal reflections on humanity's discoveries deeper and deeper into the world of the very small.

The amazing science behind the search for Earth-like planets Ever since Carl Sagan first predicted that extraterrestrial civilizations must number in the millions, the search for life on other planets has gripped our imagination. Is Earth so rare that advanced life forms like us—or even the simplest biological organisms—are unique to the universe? How to Find a Habitable Planet describes how scientists are testing Sagan's prediction, and demonstrates why Earth may not be so rare after all. James Kasting has worked closely with NASA in its mission to detect habitable worlds outside our solar system, and in this book he introduces readers to the advanced methodologies being used in this extraordinary quest. He addresses the compelling questions that planetary scientists grapple with today: What exactly makes a planet habitable? What are the signatures of life astronomers should look for when they scan the heavens for habitable worlds? In providing answers, Kasting explains why Earth has remained habitable despite a substantial rise in solar luminosity over time, and why our neighbors, Venus and Mars, haven't. If other Earth-sized planets endowed with enough water and carbon are out there, he argues, chances are good that some of those planets sustain life. Kasting describes the efforts under way to find them, and predicts that future discoveries will profoundly alter our view of the universe and our place in it. This book is a must-read for anyone who has ever dreamed of finding other planets like ours—and perhaps even life like ours—in the cosmos. In a new afterword, Kasting presents some recent breakthroughs in the search for exoplanets and discusses the challenges facing space programs in the near future.
