Every year, thousands of highly qualified individuals from the intelligence community, the military and law enforcement – as well as related areas of government and private industry – look to strike out on their own. The excitement and the prospect of making it big leads many to choose the fastpaced and potentially lucrative field of global security consulting. Some go on to live the dream. Most do not. The vast majority of new businesses, consultants included, fail to make it even through their first year. The reasons are myriad, but the trends are visible – the most frequent cause of failure is being unprepared to meet the difficult and sometimes dangerous challenges of this highly specialized market. Luke Bencie is one of the many global security consultants who struck out on his own and one of the few who has succeeded – at lightning speed. Bencie has traveled to 120 countries and has been an adviser and confidant to multinational corporations,

governments, militaries – even royalty. His success did not come without obstacles. Yet, as a friend to many in the security industry, an adherent to the philosophy of paying it forward, and a firm believer in the promise of global security consulting, Bencie has decided to share his experiences and expertise to help newcomers navigate this increasingly crowded field. Global Security Consulting, his second book, has been lauded as a font of information and insight, an invaluable guide for avoiding the pitfalls that can wreck any business, particularly ones that deal with potentially lethal adversaries. Frequently dead serious, occasionally lighthearted and always clear-headed, Global Security Consulting promises to become a standard reference for consultants worldwide – a blueprint for those with the skills, determination and raw courage to succeed in one of the 21st century's true growth industries. Read it, and be prepared.

What does it feel like to walk into your school? Is it a welcoming place, where everyone feels valued? Most school improvement efforts focus on academic goals, instructional models, curriculum, and assessments. But sometimes what can make or break your learning community are the intangibles--the relationships, identity, and connections that make up its culture. Authors Fisher, Frey, and Pumpian believe that no school improvement effort will be effective unless school culture is addressed. They identify five pillars that are critical to building a culture of achievement: 1. Welcome: Imagine if all staff members in your school considered it their job to make every student, parent, and visitor feel noticed, welcomed, and valued. 2. Do no harm: Your school rules should be tools for teaching students to become the moral and ethical citizens you expect them to be. 3. Choice words: When the language students hear helps them tell a story about themselves that is one of possibility and potential, students perform in ways that are consistent with that belief. 4. It's never too late to learn: Can you push students to go beyond the

minimum needed to get by, to discover what they are capable of achieving? 5. Best school in the universe: Is your school the best place to teach and learn? The best place to work? Drawing on their years of experience in the classroom, the authors explain how these pillars support good teaching and learning. In addition, they provide 19 action research tools that will help you create a culture of achievement, so that your school or classroom is the best it can be. After reading this book, you'll see why culture makes the difference between a school that enables success for all students and a school that merely houses those students during the school day.
