But how do we know that it's made-up of solid iron rather than liquid, considering it's about as hot as the sun at Earth's core. Earth is an unusual place because we're protected by a magnetic field. "You can't generate a magnetic field that strong without some kind of solid-liquid interaction," he explains.

Most scientists think that everything that we know and experience began with the Big Bang, 14 billion years ago. But how can we have any clue about something that supposedly happened so long ago?

[How Do We Know the Earth Is 4.6 Billion Years Old? | Smart ...](#)

The story of our quest to discover how our Solar System formed is littered with false starts, and one that astronomers are still refining.. The world's greatest thinkers originally had the Earth at the centre of creation, with the Sun, Moon, planets and stars circling around us. It's an idea that lasted for more than 1,000 years, dating back to the days of Aristotle and Ancient Greece.

[The Solar System: How do we know how it formed? - BBC ...](#)

We know what Earth's past climate was like by studying things that have been around for a long time. For example, scientists can study what Earth's climate was like hundreds of years ago by studying the insides of trees that have been alive since then.. But if scientists want to know what Earth's climate was like hundreds of thousands to millions of years ago, they study sediment cores and ice ...

[How Do We Know the Climate Is Changing? | NASA Climate Kids](#)

It is widely accepted that the Earth's interior is composed of several layers: the crust, the mantle and the core. Since the crust is readily accessible, scientists have been able to perform hands-on experiments to determine its composition; studies on the more distant mantle and core have more limited opportunities samples, so scientists also rely on analyses of seismic waves and gravity ...

[How Do We Know The Milky Way Is A Spiral Galaxy?](#) Updated on: 12 Apr 2019 by Akash Peshin. For humans, the act of determining the shape of the Milky Way galaxy is equivalent to a microbe determining the shape of the Earth. We are incapable of attaining an appropriate vantage point to discern it, because it lies, of course, outside the galaxy.
