One of the most common items

recycled all across the globe is old newspapers. Hundreds of tons of waste paper is collected daily from homes, offices, etc. There was a time when they were disposed by burning or dumping them in landfills. Nowadays, the best and most eco-friendly way to get rid of old papers is to recycle them so that they can be used again for different purposes.

[How Does Newspaper Get Recycled](#)

The recycling of paper is the process by which waste paper is turned into new paper products. It has a number of important benefits: It saves waste paper from occupying homes of people and producing methane as it breaks down. Because paper fibre contains carbon (originally absorbed by the tree from which it was produced), recycling keeps the carbon locked up for longer and out of the atmosphere.

What happens to my newspaper? - It's Easy to Recycle

The type of paper that newspaper is made from has already been recycled. In reality, it has likely been recycled multiple

times, which causes the paper fibers to become shorter each time.

When you recycle a newspaper, you are paving the way for more newspaper or tissue products to be formed.

Paper recycling - Wikipedia

Paper recycling process: Step by step
Step 1: Collection.

The process of recycling paper begins with individual users (homes, businesses, universities,... Step 2: Sorting and transportation. After collection, the paper is measured and graded for quality.
