## How Dogs Love Us Simon and Schuster

Maira Kalman, with wit and great sensitivity, reveals why dogs bring out the best in us. Maira Kalman + Dogs = Bliss. Dogs have lessons for us all. In *Beloved Dog*, renowned artist and author Maira Kalman illuminates our cherished companions as only she can. From the dogs lovingly illustrated in her acclaimed children's books to the real-life pets who inspire her still, Kalman's *Beloved Dog* is joyful, beautifully illustrated, and, as always, deeply philosophical. Here is Max Stravinsky, the dog poet of *Oh-La-La* (Max in Love)-fame, and her own Irish Wheaton Pete (almost named Einstein, until he revealed himself to be "clearly no Einstein"), who also made an appearance in the delightful *What Pete Ate: From A to Z*. And of course, there is Boganch, Kalman's in-laws' "big black slobbering Hungarian Beast." And that's just the beginning. With humor and intelligence, Kalman gives voice to the dogs she adores, noting that they

are constant reminders that life reveals the best of itself when we live fully in the moment and extend unconditional love. "And it is very true," she writes, "that the most tender, complicated, most generous part of our being blossoms without any effort, when it comes to the love of a dog."

the country.

How Dogs Love Us HarperCollins

From Alexandra Horowitz, #1 New York

Times bestselling author of Inside of a

Dog, an eye-opening, informative, and

wholly entertaining examination and

celebration of the human-canine

relationship for the curious dog owner and

science-lover alike. We keep dogs and are

kept by them. We love dogs and (we

assume) we are loved by them. We buy

them sweaters, toys, shoes; we are

concerned with their social lives, their

food, and their health. The story of

humans and dogs is thousands of years

old but is far from understood. In Our

Dogs, Ourselves, Alexandra Horowitz

explores all aspects of this unique and

complex interspecies pairing. As Horowitz

considers the current culture of dogdom,

she reveals the odd, surprising, and

contradictory ways we live with dogs. We

celebrate their individuality but breed

them for sameness. Despite our deep

emotional relationships with dogs, legally

they are property to be bought, sold,

abandoned, or euthanized as we wish.

Even the way we speak to our dogs is at

once perplexing and delightful. In thirteen

thoughtful and charming chapters, Our

Dogs, Ourselves affirms our profound

affection for this most charismatic of

animals—and opens our eyes to the

companions at our sides as never before.

How Stella Learned to Talk A&C Black

They're loyal, loving, and big-hearted—dogs are our

best friends for a good reason. Yet they have much

more to offer than just love and friendship. Let CEO

Scott MacDonald and rescue dog Sadie show you

how to have a more rewarding life and a more

successful career in Think Like a Dog. With whimsy

and insight, Scott and Sadie offer important lessons in

---

loyalty, persistence, leaving your mark, and always being a great sniffer. Scott reveals what Sadie and other dogs teach us about successful work habits and organizational strategies for outstanding business success. Want a better, happier, and more satisfying life? Want to be successful? Start by understanding a dog's perspective and applying the lessons learned!

*Think Like a Dog* Simon and Schuster

A Wall Street Journal

bestseller. The powerful bond between humans and dogs is one that's uniquely cherished. Loyal, obedient, and affectionate, they are truly "man's best friend." But do dogs love us the way we love them? Emory University neuroscientist

Gregory Berns had spent decades using MRI imaging technology to study how the human brain works, but a different question still nagged at him: What is my dog thinking? After his family adopted Callie, a shy, skinny terrier mix, Berns decided that there was only one way to answer that question--use an MRI machine to scan the dog's brain. His colleagues dismissed the idea. Everyone knew that dogs needed to be restrained or sedated for MRI scans. But if the military could train dogs to operate

---

calmly in some of the most challenging environments, surely there must be a way to train dogs to sit in an MRI scanner. With this radical conviction, Berns and his dog would embark on a remarkable journey and be the first to glimpse the inner workings of the canine brain.

Painstakingly, the two worked together to overcome the many technical, legal, and behavioral hurdles. Berns's research offers surprising results on how dogs empathize with human emotions, how they love us, and why dogs and

humans share one of the most remarkable friendships in the animal kingdom. *How Dogs Love Us* answers the age-old question of dog lovers everywhere and offers profound new evidence that dogs should be treated as we would treat our best human friends: with love, respect, and appreciation for their social and emotional intelligence.

Dog Is Love Open Road + Grove/Atlantic

Dogs want to be with us and to please us. They make good mates. They make us laugh. They keep us healthy and supply endless cuddles. Their love is unconditional, and they never judge us. They ask for little in return - kindness, a comfy bed, exercise and regular meals. With a dog at your side, you have an amazing friend. But some dogs do a little bit more. They aren't always dogs who make the front-

page news with heroics. Instead, they quietly go about their lives, willingly doing their best to help humans in a way they have been trained to do and want to do. With a Dog's Love features 16 inspirational and uplifting stories for the young reader, complete with photographs, about dogs who are quiet heroes. The stories of these incredibly special dogs celebrate the strong bond between dog and human and the amazing impact dogs can have on our lives.

An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught

---

her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. How Stella Learned to Talk is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with

---

their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

**Do You Look Like Your Dog? the Book** HarperCollins

This endearing gift book celebrates the unique connection between dogs and their human companions. There are reasons dogs are our best friends: They are loyal, affectionate, and totally committed to us. Or as photographer/writer Kim Levin puts

---

it: "Because they look us in the eye." "Because they have wrinkles, too." "Because they are family." In this charming book, Levin combines photographs with simple, insightful prose; the result is an ode that celebrates the wonders of dogs. Soulful beagle eyes. A grinning hound luxuriating in the sun. In these poignant photos, Levin captures each dog's essence and illuminates the myriad reasons why we love dogs. In America alone, 40 million people own more than 50 million dogs. Of those dedicated dog owners, about 13 million Americans say they're as attached to their dogs as they are to their best friends; some six million people rank their dogs right up there with their children. That's why everyone who has ever cherished a beloved dog-whether large or small, pure-bred or mutt-will delight in this book filled with heartwarming words and pictures to commemorate their special closeness.

The Genius of Dogs Penguin  
Famed wildlife photographer Art Wolfe has chosen one hundred of his favorite photographs of dogs- including shots from every

---

continent of the world-and teamed up with bestselling animal writer Jeffrey Moussaieff Masson to create a remarkable book that will be treasured by dog lovers far and wide. From Tibet to New York City, from Mongolia to Paris, Peru, and Ghana-in fact everywhere on earth, we see dogs living with humans in a kind of intimacy not found with any other animal. It is impossible to view these astonishing photographs without agreeing with Masson and Wolfe that there is no other relationship in nature quite like that between dogs and humans. The renowned author of *Dogs Never Lie About Love* offers deep insight into that relationship. For fifteen thousand years, Masson tells us, humans have encouraged dogs to become part of our lives, because we like being around them. And they, too, like being around us. As Masson points out, dogs don't care about our status, our color, our ethnicity; the biases, prejudices, and presuppositions of humans are foreign to dogs. Our cross-species friendship is a

---

universal relationship that cuts across all cultures and continents. The mystery of it still defies explanation, but these extraordinary photographs reveal that its uniqueness is understood throughout the world. Praise for *Dogs Make Us Human*: "Dogs Make Us Human will be greatly appreciated by dog-lovers everywhere. The text is heartwarming, and the photographs are beautiful. The book is a triumph."- Elizabeth Marshall Thomas

A classic in the Bukowski poetry canon, *Love Is a Dog from Hell* is a raw, lyrical, exploration of the exigencies, heartbreaks, and limits of love. A book that captures the Dirty Old Man of American letters at his fiercest and most vulnerable, on a subject that hits home with all of us. Charles Bukowski was a man of intense emotions, someone an editor once called a "passionate madman." Alternating between tough and gentle, sensitive and gritty, Bukowski lays bare the myriad facets of love—its selfishness

---

and its narcissism, its randomness, its mystery and its misery, and, ultimately, its true joyfulness, endurance, and redemptive power. "there is a loneliness in this world so great that you can see it in the slow movement of the hands of a clock."

Dogs Make Us Human Frances Lincoln Children's Books

In this "briskly entertaining" (New York Times Book Review), "transporting and wholly original" (People Magazine) novel, one man banishes himself to a solitary life in the Arctic Circle, and is saved by good friends, a loyal dog, and a surprise visit that changes

---

everything. In 1916, Sven Ormson leaves a restless life in Stockholm to seek adventure in Svalbard, an Arctic archipelago where darkness reigns four months of the year and he might witness the splendor of the Northern Lights one night and be attacked by a polar bear the next. But his time as a miner ends when an avalanche nearly kills him, leaving him disfigured, and Sven flees even further, to an uninhabited fjord. There, with the company of a loyal dog, he builds a hut and lives alone, testing himself against the elements. The teachings of a Finnish fur trapper, along with encouraging letters from his family and a Scottish geologist who befriended him in the mining camp, get him through his first winter. Years into his routine isolation, the arrival of an unlikely visitor salves his loneliness, sparking a chain of surprising events that will bring Sven into a family of fellow castoffs and determine the course of the rest of his life. Written with wry humor in prose as breathtaking

---

as the stark landscape it evokes, *The Memoirs of Stockholm Sven* is a testament to the strength of our human bonds, reminding us that even in the most inhospitable conditions on the planet, we are not beyond the reach of love. #1 Indie Next Pick Finalist for the Vermont Book Award Longlisted for the Center for Fiction First Novel Prize

*A Dog's Purpose* Laurence King

In the bestselling tradition of *Inside of a Dog* and *Marley & Me*, a smart, illuminating, and entertaining read on why the dog-human relationship is unique--and

possibly even "spiritual." Dr. Andrew Root's search for the canine soul began the day his eight-year-old son led the family in a moving Christian ritual at the burial service for Kirby, their beloved black lab. In the coming weeks, Root found himself wondering: What was this thing we'd experienced with this animal? Why did the loss hurt so poignantly? Why did his son's act seem so right in its sacramental feel? In *The Grace of Dogs*, Root draws on biology, history, theology, cognitive ethology (the study of animal minds), and paleontology to trace how in our mutual evolution, humans and dogs have so often helped each other to become more fully ourselves. Root explores questions

---

like: Do dogs have souls? Is it accurate to say that dogs "love" us? What do psychology and physiology say about why we react to dogs in the way that we do? The Grace of Dogs paints a vivid picture of how, beyond sentimentality, the dog-human connection can legitimately be described as "spiritual"--as existing not for the sake of gain, but for the unselfish desire to be with and for the other, and to remind us that we are persons worthy of love and able to share love. In this book for any parent whose kids have asked if they'll see Fido in Heaven, or who has looked their beloved dog in the face and wondered what's going on in there, Dr. Root delivers an

illuminating and heartfelt read that will change how we understand man's best friend.

Dogs fill our hearts with love and our minds with wonder, but their emotional lives have remained unexplored since Darwin 125 years ago. Now in *Dogs Never Lie About Love*, controversial psychoanalyst Jeffrey Masson brilliantly navigates the rich inner landscape of "our best friends." As he guides readers through the surprising depth of canine emotional complexity, Jeffrey

---

Masson draws from myth and literature, from scientific studies, and from the stories and observations of dog trainers and dog lovers around the world. But the stars of the book are the author's own three dogs whose delightful and mysterious behavior provides the way to exploring a wide range of subjects--from emotions like gratitude, compassion, loneliness, and disappointment to speculating what dogs dream of and how their powerful sense of smell shapes their perception of reality. As he sweeps aside old prejudices on animal behavior, Masson reaches into a rich universe of dog feeling to its essential core, their "master emotion": love. Like the dogs he loves, Masson's writing will capture the reader with its playful, mysterious, and serious sides. Its surprising insights provide a new dimension of understanding for dog owners everywhere.
