The Electrician National Academies Press Video Production Workshop is the first book written to be accessible and appealing to a younger, digitally savvy audience interested in learning the full range of skills involved in planning and executing a video project. It introduces all the digital tools and basic techniques in sequence for readers to build proficiency and gain a well-rounded mastery of the art and craft of video production. Author Tom Wolsky begins with lessons in video editing and camera handling, and then moves

on to scripting and storyboarding a production. Readers then step through a series of exercise projects. Separate chapters explore how to light different types of scenes as well as how to obtain well-recorded sound. The book is designed both for independent students as well as for classroom use, and it includes lessons on video journalism and its rights, responsibilities, and ethics. Related techniques for interviewing and working in a live studio are also presented. The book concludes with lessons in post-production techniques, especially motion graphics and special effects. The companion DVD is packed with DV footage for projects, plus demo plug-ins and free software.

The Auto Buyers Guide to Dealership Scams Springer

Five years ago the world lost one of its most prolific insurance scholars, Dr. Robert I. Mehr. His death in 1988 signalled the passing of not only a gifted writer and researcher, but also a pioneering teacher, mentor, and friend. The essays compiled within this volume are intended as an appropriate tribute to this occasionally outrageous individual who touched the lives of so many within the insurance community. Bob Mehr was a teacher who expected and demanded nothing less than perfect scholarship and flawless, efficient writing. Among alumni of the University of Illinois insurance doctoral program, stories still abound of late night and early morning sessions in which students and professor painstakingly debated precise words and phrases for dissertations, journal articles, and textbooks. Bob's respect for language was both immense and contagious, if at times more than a little compulsive. He joked that he could not read letters or novels without pencil in hand for editing. Bob's respect for his doctoral students was equally evident. The confidence he displayed in his students' abilities was

sometimes startling, but "competence assumed" often begot "competence in fact." The accomplishments and records amassed by the many who studied with Bob Mehr are impressive and ongoing. On the dedication page in his final textbook, Fundamentals of Insurance, Bob spoke of his affection for those he called his "academic progeny" and wished them happiness as they build their own academic families.

Unsafe at Any Speed Penguin

This book explores how a range of innovative disruptive technologies is about to combine to transform the insurance industry, the products it produces, and the way the industry is managed. It argues that unless current insurance providers react to these waves of disruption they will be swept away by new innovators. The book describes what insurers need to do to survive. The main aim is to get insurers to reimagine their industry away from the sale of a one-off product, into the sale of a series of real-time, data-based risk services.

While parts of these disruptions have been discussed, this book is the first to bring all the issues together and unites them using a theoretical framework. This book is essential reading for insurance industry participants as well as to academics interested in insurance and understanding the key issues the industry currently faces.
