American Youth is a controlled, essential, and powerful tale of a teenager in southern New England who is confronted by a terrible moral dilemma following a fatal firearms accident in his home. This tragedy earns him the unwelcome admiration of a sinister group of boys at his school and a girl associated with them. Set in a town riven by social and ideological tensions – an old rural culture in conflict with newcomers – this is a classic portrait of a young man struggling with the idea of identity and responsibility in an America ill at ease with itself.

From the acclaimed writer, director, and star of the hit documentary *The Muslims are Coming!* comes a memoir in essays about growing up Iranian-American in a post-9/11 world and the power of comedy to combat racism. Negin Farsad is an Iranian-American-Muslim female stand-up comedian who believes she can change the world through jokes. And yes, sometimes that includes fart jokes. In this candid and uproarious book, Farsad shares

"other" in an American culture that has no time for nuance. In fact, she longed to be black and/or Mexican at various points of her youth, you know, like normal kids. Right? RIGHT? Writing bluntly and hilariously about the elements of race we are often too politically correct to discuss, Farsad takes a long hard look at the iconography that still shapes our concepts of "black," "white," and "Muslim" today-and what it means when white culture defines the culture. Farsad asks the important questions like, What does it mean to have a hyphenated identity? How can we actually combat racism, stereotyping, and exclusion? Do Iranians get bunions at a higher rate than other ethnic groups? (She's asking for a friend.) **HOW TO MAKE WHITE PEOPLE LAUGH** tackles these questions with wit, humor, and incisive intellect. And along the way, you might just learn a thing or two about

tetherball, Duck Dynasty, and wine slushies.

In the wake of Sassy and as an alternative to the more staid reporting of Ms., Bitch was launched in the mid-nineties as a Xerox-and-staple zine covering the landscape of popular culture from a feminist perspective. Both unabashed in its love for the guilty pleasures of consumer culture and

deeply thoughtful about the way the pop landscape reflects and impacts women's lives, *Bitch* grew to be a popular, full-scale magazine with a readership that stretched worldwide. Today it stands as a touchstone of hip, young feminist thought, looking with both wit and irreverence at the way pop culture informs feminism—and vice versa—and encouraging readers to think critically about the messages lurking behind our favorite television shows, movies, music, books, blogs, and the like. BITCHFest offers an assortment of the most provocative essays, reporting, rants, and raves from the magazine's first ten years, along with new pieces written especially for the collection. Smart, nuanced, cranky, outrageous, and clear-eyed, the anthology covers everything from a 1996 celebration of pre-scandal Martha Stewart to a more recent critical look at the "gayby boom"; from a time line of black women on sitcoms to an analysis of fat suits as the new blackface; from an attempt to fashion a feminist vulgarity to a reclamation of female virginity. It's a recent history of feminist pop-culture critique and an arrow toward feminism's future.

John Joseph Mathews (1894–1979) is one of Oklahoma’s most revered twentieth-century authors. An Osage Indian, he was also one of the first Indigenous authors to gain national renown. Yet fame did not come easily to Mathews, and his personality was full of contradictions. In this captivating biography, Michael Snyder provides the first book-length account of this fascinating figure. Known as “Jo” to all his friends, Mathews had a multifaceted identity. A novelist, naturalist, biographer, historian, and tribal preservationist, he was a true “man of letters.” Snyder draws on a wealth of sources, many of them previously untapped, to narrate Mathews’s story. Much of the writer’s family

life—especially his two marriages and his relationships with his two children and two stepchildren—is explored here for the first time. Born in the town of Pawhuska in Indian Territory, Mathews attended the University of Oklahoma before venturing abroad and earning a second degree from Oxford. He served as a flight instructor during World War I, traveled across Europe and northern Africa, and bought and sold land in California. A proud Osage who devoted himself to preserving Osage culture, Mathews also served as tribal councilman and cultural historian for the Osage Nation. Like many gifted artists, Mathews was not without flaws. And perhaps in the eyes of some critics, he occupies a nebulous space in literary history. Through insightful analysis of his major works, especially his semiautobiographical novel *Sundown* and his meditative *Talking to the Moon*, Snyder revises this impression. The story he tells, of one remarkable individual, is

also the story of the Osage Nation, the state of Oklahoma, and Native America in the twentieth century.

In recent years considerable progress and new developments in diagnostic and interventional cardiology have been observed, such as balloon angioplasty of coronary artery stenoses, reperfusion techniques in acute myocardial infarction, new pacing, and cardioversion-defibrillation techniques in ventricular tachyar rhythmias. On 5-8 May, 1985, an international symposium on 'Invasive Cardio vascular Therapy' was held in Cologne, which provided a survey on the experi ment~I and routine therapeutic measures presently available and practiced in cardiovascular medicine. This volume is based on the oral presentations given during the symposium. In five chapters the most important traditional and new interventional techniques are discussed by experts in the

field. Chapter I contains a description of results from catheter palliation of congenital shunt disorders or relief of congenital pulmonary or aortic valve stenoses as well as the recent experience with surgical repair of single ventricle, Fallot's tetralogy and tricuspid atresia. Chapter II presents the surgical results of valve replacement with different valve prostheses in acquired valvular disease, the surgical management of bacterial endocarditis, as well as the various techniques of partial transient left heart support devices and of cardiac transplantation. In chapter III, the invasive management of chronic coronary heart disease, peripheral vascular disease by balloon catheter or laser techniques, and the surgical approach to coronary heart disease are discussed.
