Verification in an Age of Insecurity takes the reader into some of the most urgent arms control issues facing the world community, including the nuclear activities of rogue states and threats from sophisticated non-state actors. In the book, national

security expert Philip D. O'Neill, Jr. identifies and addresses issues from the resuscitated disarmament agenda, from the comprehensive test ban to fissile material and biological weapons. O'Neill examines the need for shifts in verification standards and policy suitable for our volatile era and beyond it. He surveys recent history to show how established verification procedures fail to produce the certainty necessary to meet today's threats. Verification in an Age of Insecurity goes beyond a discussion of rogue states like North Korea to offer suggestions on how best to bring compliance policy up to date with modern threats.

The Second Edition of

Social Policy and Social Change is a timely examination of the field, unique in its inclusion of both a historical analysis of problems and policy and an exploration of how capitalism and the market economy have contributed to them. The New Edition of this seminal text examines issues of discrimination, health care, housing, income, and child welfare and considers the policies that strive to improve them. With a focus on how domestic social policies can be transformed to promote social justice for all groups, Jimenez et al. consider the impact of globalization in the United States while addressing developing concerns now emerging in the global village.

The Plum Book is published by the Senate Committee on Homeland Security and Governmental Affairs and House Committee on Oversight and Reform alternately after each Presidential election. The Plum Book is used to identify Presidential appointed and other positions within the Federal Government. The publication lists over 9,000 Federal civil service leadership and support positions in the legislative and executive branches of the Federal Government that may be subject to noncompetitive appointment. The duties of many such positions may involve advocacy of Administration policies and programs and the incumbents usually have a close and confidential working relationship with the agency head or other key officials. The Plum Book was first published in 1952 during the Eisenhower administration. When President Eisenhower took office, the Republican Party

requested a list of government positions that President Eisenhower could fill. The next edition of the Plum Book appeared in 1960 and has since been published every four years, just after the Presidential election.

Privacy is one of the most urgent issues associated with information technology and digital media. This book claims that what people really care about when they complain and protest that privacy has been violated is not the act of sharing information itself—most people understand that this is crucial to social life—but the inappropriate, improper sharing of information. Arguing that privacy concerns should

---

not be limited solely to concern about control over personal information, Helen Nissenbaum counters that information ought to be distributed and protected according to norms governing distinct social contexts—whether it be workplace, health care, schools, or among family and friends. She warns that basic distinctions between public and private, informing many current privacy policies, in fact obscure more than they clarify. In truth, contemporary information systems should alarm us only when they function without regard for social norms and values, and thereby weaken the fabric of social life.
