There's a dashboard or chart for just about everything, but data alone can't help you understand and empathize with your customers. Only human insight from real people can do that. User Tested gives both individual contributors and executives an approachable, pragmatic playbook for stepping beyond standard business metrics and infusing real human insight into every business decision, design, and experience. The focus of this edition is on the XIV Gen3 running Version 11.5.x of the XIV system software, which brings enhanced value for the XIV Storage System in cloud environments. It offers multitenancy support, VMware vCloud Suite integration, more discrete performance classes, and RESTful API enhancements that expand cloud automation integration. Version 11.5 introduces support for three-site mirroring to provide high availability and disaster recovery. It also enables capacity planning through the Hyper-Scale Manager, mobile push notifications for real-time alerts, and enhanced security. Version 11.5.1 supports 6TB drives and VMware vSphere Virtual Volumes (VVOL). In the first few chapters of this book, we describe many of the unique and powerful concepts that form the basis of the XIV Storage System logical and physical architecture. We explain how the system eliminates direct dependencies between the hardware elements and the software that governs the system. In subsequent chapters, we explain the planning and preparation tasks that are required to deploy the system in your environment by using the intuitive yet powerful XIV Storage Manager GUI or the XIV command-line interface. We also describe the performance characteristics of the XIV Storage System and present options for alerting and monitoring, including enhanced secure remote support. er\*go\*nom\*ic (er-ga-'na-mik) adj: designed to allow people and the things people use to interact in the safest, most effective, and most comfortable manner You work indoors. You're not on your feet all day and you do no heavy lifting. You have escaped from the brutal nature of most human labor. And yet at the end of the day you feel exhausted. You have vague aches and pains that you are embarrassed to mention to your doctor. If you do, the doctor gives you some equally vague advice: take it easy; don't push yourself; get more rest. If that doesn't work, maybe you're a whiner, a hypochondriac. Or maybe you're being attacked by your possessions. Perhaps you've been making do with a worn-out old mattress in the bedroom, an office chair that won't let you sit up straight, and a computer screen that you struggle to read with your bifocals. You bought a desk and a file cabinet whose colors complement each other perfectly, but you had no idea how downright irritating ordinary furniture can get if the only choice you bother with is matching style and color. Somewhere in this world is a reading light, chair, bed, perhaps even a keyboard and desk, built just for you. This book will show you how to find them.
