For instance, my daily-driver Range Rover has a manual mode for its automatic transmission, and I virtually never use it -- largely because it's an automatic car with a modern computer, and it knows when to shift. But for the few times where it doesn't know when to shift, the lever is a lifesaver.

A manual transmission car doesn't have a gear called "park" like an automatic does. That means you must but the parking brake on when you park the car. To park a manual, turn the engine off and keep holding the brake pedal in. If you're on a hill, put the clutch in and move the shifter into reverse gear.
