[A Collection of Familiar Quotations](#) Penguin

All the talk of closing the achievement gap in schools obscures a more fundamental issue: do the grades we assign to students truly reflect the extent of their learning? In this lively and eye-opening book, educator Myron Dueck reveals how many of the assessment policies that teachers adopt can actually prove detrimental to student motivation and achievement and shows how we can tailor policies to address what really matters: student understanding of content. In sharing lessons, anecdotes, and cautionary tales from his own experiences revamping assessment procedures in the classroom, Dueck offers a variety of practical strategies for ensuring that grades measure what students know without punishing them for factors outside their control; critically examining the fairness and effectiveness of grading homework assignments; designing and distributing unit plans that make assessment criteria crystal-clear to students; creating a flexible and modular retesting system so that students can improve their scores on individual sections of important tests. Grading Smarter, Not Harder is brimming with reproducible forms, templates, and real-life examples of grading solutions developed to allow students every opportunity to demonstrate their learning. Written with abundant humor and heart, this book is a must-read for all teachers who want their grades to contribute to, rather than hinder, their students' success.

Maths Homework Assignments John Wiley & Sons

This fourth edition is a new, fully expanded version of the step-by-step guide to America's #1 online service. The Search Rowman & Littlefield

"As a mother of three, this book's practical road map for helping our kids learn independently is invaluable. This should be a must-read for all parents." --Jenna Bush Hager Drawing on extensive experience as classroom teachers and the directors of their highly regarded tutoring business, Abby and Brian address a range of common frustrations caused by homework. They answer the most pressing questions on every parent's mind: How much should I get involved, what does constructive help look like, and how can I help my child work independently? Taking the Stress out of Homework

breaks down for parents exactly when and how to offer homework support. Whether your child's stress point is executive functioning--the ability to plan or organize--or a subject-specific struggle in math, reading, writing, or standardized test-preparation, Abby and Brian use real-life stories to provide individualized, actionable advice. At the center of Abby and Brian's philosophy is encouraging students to break free of the "let's get to the answer already so that we can be done with the assignment" mindset; they focus instead on a process-oriented approach that fosters engagement and self-sufficiency both in and out of school. Filled with expert tips about how to build executive functioning and content skills, Abby and Brian share stress-reducing best practices so homework not only supports what kids are learning, but also helps build confidence and skills that last a lifetime.

through an interactive approach offers numerous practical examples of secondary mathematics differentiation. This book is a must read for any educator looking to reach all students." —Brad Weinhold, Ed.D., Assistant Principal, Overland High School

Quick Answers for Busy Teachers Corwin Press

"Don't You Get It?" specifically looks at people over three generations of the same family and others as well, who have lived with APD. It demonstrates the struggles that these people went through and shows how they worked and overcame their problems in communicating and learning. keywords: Auditory, Processing, Learning, Disability, Hearing, Psychology, Guide, Handbook, Comprehensive, APD.

Common Core State Standards for Grade 8 John Wiley & Sons

Our purpose in writing this book is to give minority parents (African American, Latino) the tools they need to help their children perform much better in school. The content of the book comes from discovering actual parental practices used by minority families whose children excel at school. Our research teams went to public schools in minority neighborhoods in New York City and Long Island to find high-achieving minority children. We then visited their families and interviewed the parents and children separately to uncover what the parents did to warrant such high achievement. It is these minority parents who are the instructors in this book. We have talked with them, wrote down their stories, and extracted the parental practices that we call kernels. Kernels are seeds in the plant world. The kernels on an ear of corn are the seeds needed to grow the next generation of corn. We use this term in the sense that each parental practice that we highlight in this book should be viewed as a seed for a child's academic growth. Our research teams highlight ninety-six kernels and embed many more practices in the text that bolster academic achievement. It is a resource that minority parents can use to give their children the opportunities that result from an emphasis on academics. The book is also designed for educators to use in their everyday interactions with minority and nonminority parents.

Helping Kids Live Mindfully First Edition Design Pub.

Master essential skills to ace even the toughest tests! Do tests make you nervous? Don't worry--you're not alone.
