On average, vehicles equipped with the 8.1 get less than 15 miles per gallon. You can make some changes to the way you operate your Chevrolet 8.1 to attempt to get better fuel mileage; however, you should not expect miracles. This is not a motor that will ever see 20 miles to the gallon.

How To Get Better Gas

Well, as it happens, replacing your air filter more frequently can help improve gas mileage. Your car's engine needs air to work, and it draws that air through the air filter. If your filter is clogged with dirt and debris, your car will have to work

harder to get the air it needs to run. This means more burning of gas and less fuel efficiency.

With the price fuel trending upwards, truck owners are looking for as many ways as possible to get better fuel mileage. You've probably already tried the simple things you can do to suck more miles out of a full tank, like avoiding unnecessary idling, eliminating quick accelerations, and making sure your tire pressure is correct.
