Do you know what is the advantage of natural handmade soaps and why more and more people create organic handmade soap at home with their own hands? First of all, it is a creative product, with a piece of your heart and soul. Soap crafting is an occupation for your soul and it brings joy and pleasure for those people who are engaged in this process. Soap produced in large volumes, in chemical industries, cleans so well, that it washes, along with

dust and dirt, all the protective oils from our skin. And we end up with dry, prematurely aging skin. Our book with handmade soap recipes will teach you how to create the best handmade soap - a soap that contains natural oils and organic additives - honey, oats, calendula flowers, chocolate and more. Homemade soap is enriched with oils such as olive, sea buckthorn, peach, wheat germ oil and many more oils that have a moisturizing, rejuvenating and anti-cellulite effect. Easy natural homemade soap is a great and original gift, which hardly anyone could remain indifferent about. Natural ingredients, the basis of which skin handmade soap is created, have a beneficial effect on the skin.

Natural handmade soap is devoid of drawbacks. Cleansing the skin with organic soap, you can get rid of peeling and dryness. By experimenting with different oils, you can create a soap that is suitable for your skin. Scrub effect, moisturizing effect, vitaminizing effect, anti-cellulite effect-all this is achieved by simply adding an ingredient. The aesthetic side is also important. With our recipes for homemade soap, you will find out how to create any shape: heart, flower, oval, car and so on. In addition, mixing colored masses, adding dry flower petals, using other methods of decoration, you can create a truly unique soap that will delight others and will be a real decoration of your

bathroom. Homemade soap can be a powerful means of aromatherapy, because it often includes natural essential oils. Now it will not be difficult to create a soap with your favorite smell. Vanilla and lavender, Lily of the valley and lilac - the smell of soap made with your own hands, will be totally unlike the "chemical" smells of soap made industrially. So once again the advantages of natural handmade soap include: 1. Clear skin; 2. Hydration and nutrition, thanks to natural oils; 3. Aromatherapy while using soap; 4. Aesthetic pleasure; 5. Making your own choices in creating handmade soap, you are able to choose an eco friendly product. If you are looking for the best recipes for

This book has two purposes. First, to introduce the study of work and the workplace as a method for informing the design of computer systems to be used at work. We primarily focus on the predominant way in which the organization of

work has been approached within the field of human-computer interaction (HCI), which is from the perspective of ethnomethodology. We locate studies of work in HCI within its intellectual antecedents, and describe paradigmatic examples and case studies. Second, we hope to provide those who are intending to conduct the type of fieldwork that studies of work and the workplace draw off with suggestions as to how they can go about their own work of developing observations about the settings they encounter. These suggestions take the form of a set of maxims that we have found useful while conducting the studies we have been involved in. We draw from our own fieldwork notes in order to illustrate these maxims. In addition we also offer some homilies about how to make observations; again, these are ones we have found useful in our own work. First published in 1998. This is the final volume of eighteen in the political sociology series. Using past fairly well-equipped accounts of the acquisition of independence by former colonial countries, the author seeks to fill the gap of comparative studies which endeavour to find the elements common to the various stories and to bring to bear on the whole complex process the light of political sociology.

This Revised Reprint of our 8th edition, the "gold standard" in community health nursing, **Public Health Nursing: Population-Centered Health Care in the Community**, has been updated with a new Quality and Safety

Education in Nursing (QSEN) appendix that features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. As with the previous version, this text provides comprehensive and up-to-date content to keep you at the forefront of the ever-changing community health climate and prepare you for an effective nursing career. In addition to concepts and interventions for individuals, families, and communities, this text also incorporates real-life applications of the public nurse's role, Healthy People 2020 initiatives, new chapters on forensics and genomics, plus timely coverage of disaster management and important client populations such as pregnant teens, the homeless, immigrants, and more. Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the different functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking questions. Separate chapters on community health initiatives thoroughly describe different approaches to

promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. NEW! Quality and Safety Education in Nursing (QSEN) appendix features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. NEW! Linking Content to Practice boxes provide real-life applications for chapter content. NEW! Healthy People 2020 feature boxes highlight the goals and objectives for promoting health and wellness over the next decade. NEW! Introduction to Business Springer Science & Business Media

Veteran San Francisco policeman Mullen is out to clean up the reputation of the town by re-evaluating the activity and goals of the 1851 Vigilance Committee, which has loomed so large in historical interpretations. He analyzes the incidence of crime, and describes the development of courts, police, and jails from 1846 to 1852. Describes the day-to-day negotiation and settlement process, which keeps 99% of all lawsuits from ever coming to court. The data is drawn from interviews with lawyers

involved in state and federal cases, so the perspective is a lawyer's rather than a litigant's. Paper edition (unseen), \$12.95. Annotation copyrighted by Book News, Inc., Portland, OR

This new book challenges the medical model of the psychotherapist as healer who merely applies the proper nostrum to make the client well. Instead, the authors view the therapist as a coach, collaborator, and teacher who frees up the client's innate tendency to heal. This book offers provocative reading for clinicians intrigued by the process of therapy and the process of change.

Packed with joyful and educational art experiences for kids, Play, Make, Create offers fun and engaging imaginative activities focused on the fun and reward of creating, not just producing a final project. Founded in a process-based philosophy, this unique book includes more than 40 activities set up as invitations, or

thoughtfully designed prompts to explore, create, and play. Author Meri Cherry has more than 20 years of teaching experience, and her blog (mericherry.com) has set the standard for meaningful and enriching process art experiences that are both manageable for parents, and appealing and fun for kids. Play, Make, Create begins with a guide for parents, teachers, and facilitators that discusses how to set up materials in an inviting way, how to present an activity and talk to kids about art, and how to stock the right materials for ongoing creativity. Also included are best-practice tips for clean-up, answers to frequently asked questions, and more. The book offers four types of creative invitations: Invitations to Explore (easy ideas for fun and play), Invitations to Create (open-

ended, craft-based activities), Invitations to Play (sensory-based activities), and Big Projects (ongoing process-art activities). Most feature basic materials and tools (paper, inexpensive paints, pencils, glue) that require little setup. Among the projects and activities you'll find: A collage project that takes a no-rules approach to creating with cut-out drawings and pictures. Ideas for building a science station that allow kids to experiment with kitchen cabinet supplies such as soap, measuring spoons, cotton balls, and baking soda. A prompt to draw a self-portrait, using a mirror (parents can draw themselves, too). Instructions for making homemade colored playdough. The activities in Play, Make, Create promote active, meaningful, and socially interactive learning. Children are encouraged to

wonder, experiment, and use critical thinking—and most of all, enjoy the process. By following their own inclinations and making their own choices, children gain self-confidence and hone their problem-solving skills. Get Play, Make, Create and give children the gift of creativity!

Introduction to Chemical Processes: Principles, Analysis, Synthesis enhances student understanding of the connection between the chemistry and the process. Users will find strong coverage of chemistry, gain a solid understanding of what chemical processes do (convert raw materials into useful products using energy and other resources), and learn about the ways in which chemical engineers make decisions and balance constraints to come

up with new processes and products. The author presents material and energy balances as tools to achieve a real goal: workable, economical, and safe chemical processes and products. Loaded with intriguing pedagogy, this text is essential to a student's first course in Chemical Engineering. Additional resources intended to guide users are also available as package options, such as ChemSkill Builder.

Moving away from criminal behaviour can be fraught with difficulties. Often it can involve leaving behind old habits, customs, and even friends, while at the same time adopting a new way of life. How do individuals go about making a decision to give up crime? How do they plan to sustain

this decision? And in what ways does probation help? This book explores these questions. Based on in-depth interviews with a group of men under probation supervision, Sam King investigates the factors associated with making a decision to desist from crime. The book examines strategies for desistance, and explores the factors that individuals consider when they are thinking about how they will desist. In doing so, the book sheds new light on existing understandings of desistance from crime and helps to develop our understandings of the role that individuals play in constructing their own desistance journeys. This book also highlights the role of probation in this process, offering a timely and critical review of the nature of probation under the New Labour

government in the UK between 1997-2010. The findings indicate that we should allow Probation Officers greater autonomy and discretion within their roles, and that we should free them from the bureaucracy of risk assessment and targets. Moreover, the book warns against the potential fragmentation of community supervision. As such, the book will be of interest to criminology students, researchers, academics, policymakers and practitioners, particularly those who work with ex-offenders in the community.
