A colorful square, dissected into four parts, with hinges marked in black. If you leave the blue piece fixed and swing the others around their hinges, a new shape will emerge. Can you guess just by looking what it will be? This is just one of the tricky geometrical gems that will make a puzzler ' s mind work overtime. Try drawing a set of variously shaped polygons using only a compass and a ruler (no measuring allowed!), figuring out which of two sculptures is bigger (logic alone won ' t give you the answer), and lots more.

Eula is the only square cat in town—and she doesn ' t think there ' s anything hip about it. Everything that normal cats do is hard for her: She can ' t get her square paw into mouse holes, she can ' t wear her favorite circle skirt, and all of her friends are round! Eula is sad until her two best friends show her just how well a square cat can fit into a round world. Debut author/illustrator Elizabeth Schoonmaker applies her dry wit to the topic of fitting in, and the spare text and appealing trim size of *Square Cat* make it ideal for repeated readings.

Jefferson Square was a multi-million dollar culture center...but there was nothing at all cultural about some of the things that happened there during its grand opening in the Sixties. At the Repertory Theater, a play called *Confessional* was in rehearsal. Some called it dramatic literature. Others considered it a tasteless exploitation of the playwright ' s former marriage to America ' s queen of sex. In the expensive interior of Symphony Hall, the brilliant and erratic conductor of the Jefferson Square Symphony Orchestra was working feverishly on a new concerto while his private life was rushing toward its own scandalous crescendo. In the board room, the dream of the state ' s governor for a presidential nomination was interrupted by the discovery that Jefferson Square was making this rich man richer. And in the executive offices, where architects ' drawings were still being argued over, Jefferson Square ' s recently hired cultural director was being tempted to destroy what he had been

employed to hold together. Jefferson Square provides a fascinating glimpse of life behind the scenes in the midst of the creation of a new urban cultural epicenter, a symbol of the gentrification forcing out longtime neighborhood inhabitants. From the glitz and the glamor of Jefferson Square proper, to the hardships faced by residents of the condemned projects in the area, Gerson brings microcosms of the Sixties to Technicolor life.

Square in a Square Simon and Schuster

Originally, my intention was to write a "History of Algebra", in two or three volumes. In preparing the first volume I saw that in ancient civilizations geometry and algebra cannot well be separated: more and more sections on ancient geometry were added. Hence the new title of the book: "Geometry and

Algebra in Ancient Civilizations". A subsequent volume on the history of modern algebra is in preparation. It will deal mainly with field theory, Galois theory and theory of groups. I want to express my deeply felt gratitude to all those who helped me in shaping this volume. In particular, I want to thank Donald Blackmore Wagner (Berkeley) who put at my disposal his English translation of the most interesting parts of the Chinese "Nine Chapters of the Art of Arithmetic" and of Liu Hui's commentary to this classic, and also Jacques Sesiano (Geneva), who kindly allowed me to use his translation of the recently discovered Arabic text of four books of Diophantos not extant in Greek. Warm thanks are also due to Wyllis Bandler (Colchester, England) who read my English text very carefully and suggested several improvements, and to Annemarie Fellmann (Frankfurt) and Erwin Neuenschwander (Zurich) who helped me in correcting the proof sheets. Miss Fellmann also typed the manuscript and drew the figures. I also want to thank the editorial staff and production department of Springer-Verlag for their nice cooperation.
