A father's long-lost letters spark a compelling tale of inheritance and creativity, loss and reunion When Louisa Deasey receives a message from a Frenchwoman called Coralie, who has found a cache of letters in an attic, written about Louisa's father, neither woman can imagine the events it will set in motion. The letters, dated 1949, detail a passionate affair between Louisa's father, Denison, and Coralie's grandmother, Michelle, in post-war London. They spark Louisa to find out more about her father, who died when she was six. From the seemingly simple question "Who was Denison Deasey?" follows a trail of discovery that leads Louisa to the streets of London, to the cafes and restaurants of Paris and a poet's villa in the south of France. From her father's secret service in World War II to his relationships with some of the most famous bohemian artists in post-war Europe, Louisa unearths a portrait of a fascinating man, both at the epicenter and the mercy of the social and political currents of his time. A Letter from Paris is about the stories we tell ourselves, and the secrets the past can uncover, showing the power of the written word to cross the bridges of time.

## How to Be an American Housewife Tyndale House Publishers, Inc.

*Outline of a Theory of Practice* is recognized as a major theoretical text on the foundations of anthropology and sociology. Pierre Bourdieu, a distinguished French anthropologist, develops a theory of practice which is simultaneously a critique of the methods and postures of social science and a general account of how human action should be understood. With his central concept of the habitus, the principle which negotiates between objective structures and practices, Bourdieu is able to transcend the dichotomies which have shaped theoretical thinking about the social world. The author draws on his fieldwork in Kabylia (Algeria) to illustrate his theoretical propositions. With detailed study of matrimonial strategies and the role of rite and myth, he analyses the dialectical process of the 'incorporation of structures' and the objectification of habitus, whereby social formations tend to reproduce themselves. A rigorous consistent materialist approach lays the foundations for a theory of symbolic capital and, through analysis of the different modes of domination, a theory of symbolic power.

These days, there's no better business tool than a book. But most people don't know how to write one—or even where to start. Turns out the best place is the messy middle. Anna David knows this more than anyone. When the New York Times bestselling author of seven books got sober and sold a book about her recovery to the biggest publisher in the world, she thought she'd made it. Then she learned the hard way that trying to make a living by selling books to traditional publishers was a cruel joke—and that accepting the unacceptable was no way to live. The publishing industry was ripe for disrupting. But first David had to make a mess and then learn from it. After years of struggle and self-discovery, she ended up not only mentoring and publishing hundreds of bestselling authors but also thriving personally and professionally. Now she's sharing what she's learned—and showing others how to do the same. In this page-turning and useful memoir-meets-manual, David reveals her personal lows (doing cocaine by herself while contemplating suicide), her career lows (a past-his-prime celebrity hurling a phone at her as she wrote his biography) and how her life today wouldn't be possible without those experiences. With deft humor and unique insight, David demonstrates how much early childhood programming can set us up to repeat our own dysfunctional patterns—until we're ready to shift our behavior. The last quarter of the book is a practical guide so that readers can make their own mess into a message—and memoir.

**A Shepherd to Fools** is the second of Drew Mendelson's trilogy

of Vietnam War novels that began with *Song Ba To* and will conclude with *Poke the Dragon*. *Shepherd*: It is the ragged end of the Vietnam war. With the debacle of a failing South Vietnamese invasion of Northern Laos as background, *A Shepherd to Fools* tells the harrowing tale of a covert Hatchet Team of US soldiers and Montagnard mercenaries. They are ordered to find and capture or kill a band of American deserters, called Longshadows, before the world learns of their paralyzing rebellion. An earlier attempt to capture them failed disastrously, the facts of it buried. Captain Hugh Englander commands the Hatchet Team. He is a humorless bastard, sneering and discourteous to every regular army soldier. He cares little for the welfare of his own men and nothing for the lives of the deserters. The conflict between him and Captain David Weisman, the artillery officer assigned to the mission for artillery support, threatens to tear the team apart. Deep in the Laotian jungle, the team is caught in a final, horrific battle facing an enemy armed with Sarin nerve gas, the “worst of the worst” of the war's clandestine weapons.

“...an engaging and enlightening account from which we all can benefit.”—The Wall Street Journal A better way to combat knee-jerk biases and make smarter decisions, from Julia Galef, the acclaimed expert on rational decision-making. When it comes to what we believe, humans see what they want to see. In other words, we have what Julia Galef calls a “soldier” mindset. From tribalism and wishful thinking, to rationalizing in our personal lives and everything in between, we are driven to defend the ideas we most want to believe—and shoot down those we don't. But if we want to get things right more often, argues Galef, we should train ourselves to have a “scout” mindset. Unlike the soldier, a scout's goal isn't to defend one side over the other. It's to go out, survey the territory, and come back with as accurate a map as possible. Regardless of what they hope to be the case, above all, the scout wants to know what's actually true. In *The Scout Mindset*, Galef shows that what makes scouts better at getting things right isn't that they're smarter or more knowledgeable than everyone else. It's a handful of emotional skills, habits, and ways of looking at the world—which anyone can learn. With fascinating examples ranging from how to survive being stranded in the middle of the ocean, to how Jeff Bezos avoids overconfidence, to how superforecasters outperform CIA operatives, to Reddit threads and modern partisan politics, Galef explores why our brains deceive us and what we can do to change the way we think.
