36,000 B.C. by Thoth, an Atlantean priest-king, this manuscript dates far back beyond reach of any Egyptian writings ever found. The author, Thoth, a Master-Teacher of the early Egyptians, put this treatise to writing in his native Atlantean language and Dr. Doreal, by use of his expertise as an Occultist and Master of time and space, was given the directive to retrieve these Tablets and translate them into English for the edification of modern man. The powerful and rhythmic verse of Thoth is wonderfully retained in Doreal's translation. Contained within the pages of Thoth's masterpiece of Spiritual and Occult Wisdom is the synthesis of the Ancient Wisdom Teachings, the guideline for initiates of all ages, revealing the Knowledge and Wisdom hitherto held secret, but now in this New Age, revealed to all Seekers on the Path of Light. Dr. M. Doreal, Ms.D., Psy.D., is the Spiritual Teacher of a multitude of Seekers of Light, having founded a Metaphysical Church and College - The Brotherhood of the White Temple, Inc. He is the author of all of the Organization's writings and teachings, having been given permission for the Esoteric Wisdom to be remitted in a public forum by the Great White Lodge, the Elder Brothers of mankind who shape and form the Spiritual evolution of earth's inhabitants. The Brotherhood of the White Temple, Inc. is a correspondence school, accredited through the State of Colorado, and mails out to its worldwide membership weekly Lessons of Truth. Its four and one-half year College Course unveils the secrets of the Symbolism of all Mystery Schools, giving precisely and beautifully, the step by step progression all Seekers have searched for in their quest for Oneness with God, and for attainment of Cosmic Consciousness. Rover V8 — the Story of the Engine tells the fascinating story of the engine that created a legend in its own lifetime. Starting life as a General Motors design in 1961, but withdrawn three years later in favour of cheaper technology, it reached Rover by chance in the mid-1960s. Few other British companies then had V8 engines in production, and Rover immediately gained a special status when the V8 entered UK production during 1967. This was an extraordinarily compact design and also extraordinarily light, thanks to its all-aluminium alloy construction. It was not a temperamental high-performance engine, but had a well-proven and simple architecture that made it both reliable and easy to work on. Small wonder, then, that the Rover V8 was bought by sports car makers who needed a light, compact and powerful engine. Small wonder that Rover kept it in production for so long, developing multiple different sizes and versions. Small wonder that the engine is still revered by Rover and Land Rover enthusiasts today, or that its popularity as an aftermarket conversion has ensured that it remains in small-volume production, half a century after entering production in the UK.
