In both cases, citation entries should contain the author, publication date, the DSM-5's title, version of the manual, and the DOI or link. When citing chapters, writers should include their full entries after the publication date. Besides, in-text citations contain the author and publication date.

When you include information from a lab manual in text, put a citation inside parentheses.

Insert the name of the issuer of the manual, such as a company, a college department or an instructor's surname. Add a comma and then list the publication year, such as: (Department of Physics, 2012).

APA (American Psychological Association) style is most frequently used within the social sciences, in order to cite various sources. This APA Citation Guide, revised according to the 6th edition of the APA manual, provides the general format for in-text citations and the reference page.

When you reference or quote a user manual in the text of your paper, include an in-text citation to show where the information comes from. The in-text citation will include the author name of a source -- in this case, the company name -- the year of publication and the page number, if applicable.
