Honda GX series engine Valve adjustment

The piston, crankshaft, camshaft and everything else in the Honda gx160 motor look pretty good. So where do we go from here. use this as a guide for the honda gx160, gx120, gx200 models. [Honda GX160 DIY Rebuild teardown](#)

The Honda GX 160 is a horizontal-shaft engine,

rated at 4.8 horsepower. It features an overhead valve design, cast-iron sleeve and electronic ignition system. To promote engine longevity and consistent performance, the Honda GX 160 employs a mechanical governor, designed to limit the engine's rpm.

How to Adjust a Honda Carburetor | It Still Runs

The total number of degrees that the valve works for is called the 'duration'. (to check for the optimum valve 'lift' we would mount the cylinder head on a flow bench and test for amount of air flowing at various valve lift positions. The most airflow is the best valve lift.

Engine Parts

Well, I assume you have the latest version of the Honda rules V10 from www.abkc.org.uk or www.prokartengineparts.com As you say you are not allowed to do too much. You need to determine what spec your engines are eg T1 T2 or earlier. Standard engines need degoverning, valve springs changed (normally to G4 spring) and ignition timing advanced in line with rules and engine type.

Performance Basics - Affordable Go Karts

This video explains how to adjust the governor, idle, and maximum speed on the Honda GX160/120.

GX160 Governor & Carburetor Speed Adjustments

Start your Honda engine and allow it to idle for about five minutes until it is warmed up. Shut the engine off and remove the air cleaner from the top of the engine by using a pair of pliers to remove the nut on top of the air cleaner.

GX series, V-twin
series, iGX series.
Honda's Oil Alert
system helps to
prevent engine
seizure due to a
low oil condition.
The system consists
of an oil level
sensor inside the
crankcase. When the
oil reaches a level
that is too low for
safe operation, the

engine warns you or
stops
automatically.

INCREASE COMPRESSION:
For those of you using
the popular Honda
GX200 a great hop up
trick is to install a
GX160 (18cc) cylinder
head or one of the
older 14cc cylinder
heads. These cylinder
heads have a smaller
combustion chamber
which will increase
compression. This is a
simple bolt-on trick
which provides
impressive gains in
horsepower.
