Well, I assume you have the latest version of the Honda rules V10 from www.abkc.org.uk or www.prokartengineparts.com As you say you are not allowed to do too much. You need to determine what spec your engines are eg T1 T2 or earlier. Standard engines need degoverning, valve springs changed ( normally to G4 spring) and ignition timing advanced in line with rules and engine type.

**INCREASE COMPRESSION:** For those of you using the popular Honda GX200 a great hop up trick is to install a GX160 (18cc) cylinder head or one of the older 14cc cylinder heads. These cylinder head s have a smaller combustion chamber which will increase compression. This is a simple bolt-on trick which provides impressive gains in horsepower.
