Automate the Boring Stuff with Python, 2nd Edition "O'Reilly Media, Inc." A journalist’s provocative and spellbinding account of her eighteen months spent disguised as a man. Norah Vincent became an instant media sensation with the publication of *Self-Made Man*, her take on just how hard it is to be a man, even in a man’s world. Following in the tradition of John Howard Griffin (*Black Like Me*), Vincent spent a year and a half disguised as her male alter ego, Ned, exploring what men are like when women aren’t around. As Ned, she joined a bowling team, took a high-octane sales job, went on dates with women (and men), visited strip clubs, and even managed to infiltrate a monastery and a men’s therapy group. At once thought-provoking and pure fun to read, *Self-Made Man* is a sympathetic and thrilling tour de force of immersion journalism. **Self-Made Man** "O'Reilly Media, Inc."

Why have so many contemporary poets turned to source material, from newspapers to governmental records, as inspiration for their poetry? How can citational poems offer a means of social engagement? Contested Records analyzes how some of the most well-known twenty-first century North American poets work with fraught documents. Whether it’s the legal paperwork detailing the murder of 132 African captives, state transcriptions of the last words of death row inmates, or testimony from miners and rescue workers about a fatal mine disaster, author Michael Leong reveals that much of the power of contemporary poetry rests in its potential to select, adapt, evaluate, and extend public documentation. Examining the use of documents in the works of Kenneth Goldsmith, Vanessa Place, Amiri Baraka, Claudia Rankine, M. NourbeSe Philip, and others, Leong reveals how official records can evoke a wide range of emotions—from hatred to veneration, from indifference to empathy, from desire to disgust. He looks at techniques such as collage, plagiarism, re-reporting, and textual outsourcing, and evaluates some of the most loved—and reviled—contemporary North American poems. Ultimately, Leong finds that if bureaucracy and documentation have the power to police and traumatize through the exercise of state power, then so, too, can document-based poetry function as an unofficial, counterhegemonic, and popular practice that authenticates marginalized experiences at the fringes of our cultural memory.

IWork: The Missing Manual O'Reilly Media

Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. Google Apps: The Missing Manual teaches you how to use three relatively new applications from Google: "Docs and Spreadsheets", which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook. This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. Google Apps: The Missing Manual is the one book you need to get the most out of this increasingly useful part of the Google empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with Google Apps: The

Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
