Usually, when you turn off an iPhone, you hold down the power button for a few seconds and then swipe on the screen to turn off the device. On the newer iPhones, though, holding down the power button activates Siri. So Apple had to get a bit creative during those times when you want to shut down your iPhone.

Choose Start and then click the Shut Down button. If you prefer to stop your computer running but not turn the power off, click the arrow to the right of the Shut Down button and, in the resulting shortcut menu, choose Hibernate on a laptop (or simply close the lid of your laptop) to shut the computer down. If you want to reboot (turn off and turn back on) your computer, choose Restart.
