It is a fact that not only is the central brain really a trinity of threePg 19 brains, but that, in addition to these, every one has a great number of 'little brains' distributed over his nervous system, any and all of which are capable of receiving sensory reports and also of sending forth motor impulses. About William Walker Atkinson, the Author: It is not known whether he ever acknowledged authorship of these

pseudonymous works, but all of the supposedly independent authors whose writings are now credited to Atkinson were linked to one another by virtue of the fact that their works were released by a series of publishing houses with shared addresses and they also wrote for a series of magazines with a shared roster of authors. ...Randolph was known for embroidering the truth when it came to his own autobiography (he claimed that his mother Flora Randolph, an African American woman from Virginia, who died when he was eleven years old, had been a foreign princess) but he was actually telling the truth-or something very close to it, according to his biographer John Patrick Deveney-when he said that he had met the Maharajah in Europe and had learned from him the proper way to use both polished gemstones and Indian 'bhattah mirrors' in divination.
