Their mission is to fulfill a centuries old mandate issued by a long forgotten grand jury directing their predecessors to 'use all resources to ferret out the murder of Etna Bittenbender'. Their journey through the darkest inner recesses of the human soul gives form and shape to an innocent life brutally snuffed out and of a depraved crime both of which had been reduced to nothing more than a dim memory.

The guide all MBAs and executive education students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.

Conducting phenomenological research for dissertations can be an involved and challenging process, and writing it up is often the most challenging part. *How to Write a Phenomenological Dissertation* gives students practical, applied advice on how to structure and develop each chapter of the dissertation specifically for phenomenological research. Phenomenology is about personal experience and personal experience varies from researcher to researcher. However, this variation is a big source of confusion for new researchers in the social, behavioral, or health sciences. This brief text is written in a simple, step-by-step fashion to account for this flexibility and variation while also providing structure necessary for a successful dissertation. Broken up into chapters that follow each chapter of the dissertation, this text logically addresses the various parts of phenomenological research, starting with ensuring phenomenology is the right method for your research, writing the literature review, going through methods and results sections to analysis and discussion. The author, using experience gleaned from supervising phenomenological dissertations for many years, gives time-tested advice on how structure the dissertation to fit into more common frameworks, using checklists and tables throughout. Each chapter includes a list of helpful resources for students to use alongside this book with specific information on methods and research. Unique to this text is a chapter on creating your own phenomenological method which allows students to expand their viewpoints and experiment in future studies after the dissertation.
