Many facets of our world appear biased toward the couples' lifestyle; there's often an insinuation in advertisements, private conversations, and public gatherings that being alone means being unfulfilled--that singleness is a second-class status. How could that be true? In Joyfully Single in a Couples' World, Bible teacher Harold J. Sala

clearly states: "What I want to accomplish is to help singles understand that they can find contentment and peace where they are right now, that they don't have to be married to be happy. I want to help them come to grips with who they are and to help them to discover where God wants them to go with their lives and futures. Finding God's help to meet the present need is the key to peace and fulfillment." Chapters on making peace with your dreams, handling other people's expectations, the beauty of friendships, and God's will guide readers to great joy in the here and now.

Brendon Burchard said, "You need, more than anything else, daily momentum. It's the secret of all life happiness." "Secret of all life happiness?"
Whoa. Sounds pretty good to me. Just a little "daily momentum"? No problem, right? But what if you're stuck? Maybe you've been trying to break through but just can't seem to get ahead. Every day seems like Groundhog Day: the same disappointment as yesterday. Or worse: one step forward and two steps back. Ugh. "Every Single Day" offers a simple prescription for building daily momentum that leads to true and powerful change that lasts. If you really want it, that is. **HOW MUCH DO YOU WANT TO CHANGE? HOW BADLY DO YOU WANT SUCCESS?** Bradley Charbonneau's life drastically changed when, on Nov. 1, 2012, he accepted a challenge to Write

Every Day for a month. What happened next changed his life in ways he could have never imagined. "Every Single Day" tells his story--and teaches you how to achieve what you're after. If you 're ready to do the same, get your copy of " Every Single Day " now. Because you are after something. You know it. We all know it. I'm rooting for you.

'Life-writing' is a generic term meant to encompass a range of writings about lives or parts of lives, or which provide materials out of which lives or parts of lives are composed. These writings include not only memoir, autobiography, biography, diaries, autobiographical fiction, and biographical fiction, but letters, writs, wills, written anecdotes, depositions, marginalia, lyric poems, scientific and historical writings, and digital forms (including blogs, tweets, Facebook entries). On Life-Writing offers a sampling of approaches to the study of life-writing, introducing readers to something of the range of forms the term encompasses, their changing fortunes and features, the notions of 'life,' 'self' and 'story' which help to explain these changing fortunes and features, recent attempts to group forms, the permeability of the boundaries between forms, the moral problems raised by life-writing in all forms, but particularly in fictional forms, and the relations between life-writing and

history, life-writing and psychoanalysis, life-writing and philosophy. The essays mostly focus on individual instances rather than fields, whether historical, theoretical or generic. Generalizations are grounded in particulars. For example, the role of the 'life-changing encounter,' a frequent trope in literary life-writing, is pondered by Hermione Lee through an account of a much-storied first meeting between the philosopher Isaiah Berlin and the Russian poet Anna Akhmatova; James Shapiro examines the history of the 'cradle to grave' life-narrative, as well as the potential distortions it breeds, by focusing on Shakespeare biography, in particular attempts to explain Shakespeare's so-called 'lost years'.

People who are single are changing the face

of America. Did you know that: * More than 40 percent of the nation's adults---over 87 million people---are divorced, widowed, or have always been single. * There are more households comprised of single people living alone than of married parents and their children. * Americans now spend more of their adult years single than married. Many of today's single people have engaging jobs, homes that they own, and a network of friends. This is not the 1950s---singles can have sex without marrying, and they can raise smart, successful, and happy children. It should be a great time to be single. Yet too often single people are still asked to defend their single status by an onslaught of judgmental peers and fretful relatives. Prominent people in politics, the popular

press, and the intelligentsia have all taken turns peddling myths about marriage and singlehood. Marry, they promise, and you will live a long, happy, and healthy life, and you will never be lonely again. Drawing from decades of scientific research and stacks of stories from the front lines of singlehood, Bella DePaulo debunks the myths of singledom---and shows that just about everything you've heard about the benefits of getting married and the perils of staying single are grossly exaggerated or just plain wrong. Although singles are singled out for unfair treatment by the workplace, the marketplace, and the federal tax structure, they are not simply victims of this singlism. Single people really are living happily ever after. Filled with bracing bursts

of truth and dazzling dashes of humor, *Singled Out* is a spirited and provocative read for the single, the married, and everyone in between. You will never think about singlehood or marriage the same way again. *Singled Out* debunks the Ten Myths of Singlehood, including: Myth #1: The Wonder of Couples: Marrieds know best. Myth #3: The Dark Aura of Singlehood: You are miserable and lonely and your life is tragic. Myth #5: Attention, Single Women: Your work won't love you back and your eggs will dry up. Also, you don't get any and you're promiscuous. Myth #6: Attention, Single Men: You are horny, slovenly, and irresponsible, and you are the scary criminals. Or you are sexy, fastidious, frivolous, and gay. Myth #7: Attention,

Single Parents: Your kids are doomed. Myth #9: Poor Soul: You will grow old alone and you will die in a room by yourself where no one will find you for weeks. Myth #10: Family Values: Let's give all of the perks, benefits, gifts, and cash to couples and call it family values. "With elegant analysis, wonderfully detailed examples, and clear and witty prose, DePaulo lays out the many, often subtle denigrations and discriminations faced by single adults in the U.S. She addresses, too, the resilience of single women and men in the face of such singlism. A must-read for all single adults, their friends and families, as well as social scientists and policy advocates." ---E. Kay Trimmerger, author of The New Single Woman

IBM® DB2® buffer pools are still a key resource for ensuring good performance. This has become increasingly important as the difference between processor speed and disk response time for a random access I/O widens in each new generation of processor. An IBM System z® processor can be configured with large amounts of storage, which if used wisely, can help compensate by using storage to avoid synchronous I/O. Several changes in buffer pool management have been provided by DB2 10 and DB2 11. The purpose of this IBM Redpaper™ is to cover the following topics:

- Describe the functions of the DB2 11 buffer pools
- Introduce a number of matrixes for read and write performance of a buffer pool
- Provide information about how to set up and monitor the DB2 buffer pools

The paper is intended to be read by DB2 system administrators, but it might be of interest to any IBM z/OS® performance specialist. It is assumed that the reader is familiar with DB2 and performance tuning. In this paper, we also assume

that you are familiar with DB2 11 for z/OS performance. See DB2 11 for z/OS Technical Overview, SG24-8180; and DB2 11 for z/OS Performance Topics, SG24-8222, for more information about DB2 11 functions and their performance.

Research shows that five strategies correlate with the successful completion of a dissertation: Establishing a consistent writing routine Working with a support group Consulting your advisor Understanding your committee ' s expectations Setting a realistic and timely schedule Building on these insights, this

book is for anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity. The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing stages of the dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, “ my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while

writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want you to be able to complete your writing so that you can move on with the rest of your life. ” Few scholars, let alone graduate students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the dissertation process. In particular, it promotes the concept of writing networks – whether writing partners or groups – to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars offered by departments or graduate colleges. The techniques described will help new faculty advise their students more effectively and even achieve greater fluency in their own writing.

This carefully crafted ebook: "Collected Works of P. C. WREN: 4 Novels & Stories from the Foreign Legion" is formatted for your eReader with a functional and detailed table of contents. Percival Christopher Wren (1875-1941) was an English writer, mostly of adventure fiction. His novels and short stories mostly deal with colonial soldiering in Africa. While his fictional accounts of life in the pre-1914 Foreign Legion are highly romanticized, his details of Legion uniforms, training, equipment and barrack room layout are generally accurate, which has led to suggestions that Wren himself served with the legion. This thought-provoking collection not only takes us into the past and the future, but also explores what might happen if we attempt to manipulate time to our own advantage. These stories show what happen once you start to meddle with time and the paradoxes that might arise. It also raises questions about whether we understand time, and how we perceive it. Once we move outside the present day, can we ever return or do we move into an alternate world? What happens if our meddling with Nature leads to time flowing backwards, or slowing down or stopping all together? Or if we get trapped in a constant loop from which we can never escape. Is the past and future immutable or will we ever be able to escape the inevitable? These are just some of the questions that are raised in these challenging, exciting and sometimes amusing stories by Kage Baker, Simon Clark, Fritz Leiber, Christopher Priest, Kristine Kathryn Rusch, Robert Silverberg, Michael Swanwick, John Varley and many

others.

There is no need to feel like you are behind in writing or that you need to be consistent every day. Although I highly recommend you coming back to your journal on a regular basis, don't feel the pressure to write every day (especially if you are just getting used to journaling). Being single can be tough when it seems like everyone else around you is getting married and having kids (especially when those are the desires of your heart). Use this journal to write your frustrations, to pray for your future spouse, to work through heartbreak, and to just be

real with God. There are a lot of truth bombs in this journal that are going to make you think. If something gets stirred up in your heart, use this journal to write it down. Don't dismiss it. Work through it with the Lord. Ask the Lord to show you what's going on in your heart above all else. Whenever you get out on paper what you need to get out, always end with hope and encouragement to yourself. I want you to know there are no rules when it comes to writing. Just write. Write whatever comes to your mind and let it flow out onto the paper. Just remember that being single is not a curse and there's nothing you can do to make Him love you any less.

This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section

suggesting pedagogical implications.
