A beautiful, arresting short story by Toni Morrison—the only one she ever wrote—about race and the relationships that shape us through life, with an introduction by Zadie Smith. Twyla and Roberta have known each other since they were eight years old and spent four months together as roommates in the St. Bonaventure shelter. Inseparable at the time, they lose touch as they grow older, only to

find each other later at a diner, then at a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and in disagreement each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Written in 1980 and anthologized in a number of collections, this is the first time *Recitatif* is being published as a stand-alone hardcover. In the story, Twyla 's and Roberta 's races remain ambiguous. We know that one is white and one is black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? Morrison herself described this story as “ an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial. ” *Recitatif* is a remarkable look into what keeps us together and what keeps us apart, and about how perceptions are made tangible by reality.

Mexican Literature in Theory University of Pennsylvania Press
Mexican Literature in Theory is the first book in any language to engage post-independence Mexican literature from the perspective of current debates in literary and cultural theory. It brings together scholars whose work is defined both by their innovations in the study of Mexican literature and by the theoretical sophistication of their scholarship. *Mexican Literature in Theory* provides the reader with two contributions. First, it is one of the most complete accounts of Mexican literature available, covering both canonical texts as well as the most important works in contemporary production. Second, each one of the essays is in itself an important contribution to the elucidation of specific texts. Scholars and students in fields such as Latin American studies, comparative literature and literary theory will find in this book compelling readings of literature from a theoretical perspective, methodological suggestions as to how to use current theory in the study of literature, and important debates and revisions of major theoretical works through the lens of Mexican literary works.

A leading figure in the debate over the literary canon, Jane Tompkins was one of the first to point to the ongoing relevance of popular women's fiction in the 19th century, long overlooked or scorned by literary critics. Now, in *West of Everything*, Tompkins shows how popular novels and films of the American west have

shaped the emotional lives of people in our time. Into this world full of violence and manly courage, the world of John Wayne and Louis L'Amour, Tompkins takes her readers, letting them feel what the hero feels, endure what he endures. Writing with sympathy, insight, and respect, she probes the main elements of the Western--its preoccupation with death, its barren landscapes, galloping horses, hard-bitten men and marginalized women--revealing the view of reality and code of behavior these features contain. She considers the Western hero's attraction to pain, his fear of women and language, his desire to dominate the environment--and to merge with it. In fact, Tompkins argues, for better or worse Westerns have taught us all--men especially--how to behave. It was as a reaction against popular women's novels and women's invasion of the public sphere that Westerns originated, Tompkins maintains. With Westerns, men were reclaiming cultural territory, countering the inwardness, spirituality, and domesticity of the sentimental writers, with a rough and tumble, secular, man-centered world. Tompkins brings these insights to bear in considering film classics such as *Red River* and *Lonely Are the Brave*, and novels such as Louis L'Amour's *Last of the Breed* and Owen Wister's *The Virginian*. In one of the most moving chapters (chosen for Best American Essays of 1991), Tompkins shows how the life of Buffalo Bill Cody, killer of Native Americans and charismatic star of the Wild West show, evokes the contradictory feelings which the Western typically elicits--horror and fascination with violence, but also love and respect for the romantic ideal of the cowboy. Whether interpreting a photograph of John Wayne of meditating on the slaughter of cattle, Jane

Tompkins writes with humor, compassion, and a provocative intellect. Her book will appeal to many Americans who read or watch Westerns, and to all those interested in a serious approach to popular culture.

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

This collection offers a variety of approaches to aspects of women ’ s lives. It moves beyond men ’ s prescriptive pronouncements about female nature to women's lived experiences, replacing the singular woman with plural women and illuminating female agency. The contributors show that women ’ s lives changed over the life course and differed according to region and social class. They also demonstrate that in the early modern period the largely private spaces in women ’ s lives were not enclosed worlds isolated from the public spaces in which men operated. Contributors to this important collection are leading international scholars and offer strong, substantial, and archival-based research.

Although the Enlightenment is often associated with the emergence of human rights and humanitarian sensibility, "humanity" is an elusive category in the literary, philosophical, scientific, and political writings of the period. *Fiction Without Humanity* offers a literary history of late seventeenth- and early eighteenth-century efforts to define the human. Focusing on the shifting terms in which human difference from animals, things, and machines was expressed, Lynn Festa argues that writers and artists treated humanity as an indefinite class, which needed to be called into being through literature and the arts. Drawing on an array of literary, scientific, artistic, and philosophical devices—the riddle, the fable, the microscope, the novel, and trompe l'oeil and still-life painting—*Fiction Without Humanity* focuses on experiments with the perspectives of nonhuman creatures and inanimate things. Rather than deriving species membership from sympathetic identification or likeness to a fixed template, early Enlightenment writers and artists grounded humanity in the enactment of capacities (reason, speech, educability) that distinguish humans from other creatures, generating a performative model of humanity capacious enough to accommodate broader claims to human rights. In addressing genres typically excluded from canonical literary histories, *Fiction Without Humanity* offers an alternative account of the rise of the novel, showing how these early experiments with nonhuman perspectives helped generate novelistic techniques for the representation of consciousness. By placing the novel in a genealogy that embraces paintings, riddles, scientific plates, and

fables, Festa shows realism to issue less from mimetic exactitude than from the tailoring of the represented world to a distinctively human point of view.
