An invaluable handbook, *How to Write Art History* enables students to get the most from their art history course. In a clear and engaging style, Anne D'Alleva empowers readers to approach their coursework with confidence and energy. The book introduces two basic art historical methods – formal analysis and contextual analysis – and this second edition provides even more step-by-step guidance about how these methods can be used in class discussion and in writing essays and papers. The common strengths and weaknesses of an art history essay are highlighted by using real examples of written work, and at each stage of the writing process D'Alleva offers valuable advice on developing an argument convincingly. Providing a fascinating view of the study of art history within its historical context, this book will be particularly helpful for those considering a career in this rewarding discipline.

A creative spirit learns that thinking "ish-ly" is far more wonderful than "getting it right" in this gentle new fable from the creator of the award-winning picture book *The Dot*. Ramon loved to draw. Anytime. Anything. Anywhere. Drawing is what Ramon does. It's what

makes him happy. But in one split second, all that changes. A single reckless remark by Ramon's older brother, Leon, turns Ramon's carefree sketches into joyless struggles. Luckily for Ramon, though, his little sister, Marisol, sees the world differently. She opens his eyes to something a lot more valuable than getting things just "right." Combining the spareness of fable with the potency of parable, Peter Reynolds shines a bright beam of light on the need to kindle and tend our creative flames with care.

written word, however, responding to art can engender self-reflection, creativity, and help writers to build characters, plot, and setting. This book unites the history and tradition of ekphrasis, its conventions, the writing process, and multi-genre writing prompts. In addition to subjects such as early art engagement, psychology, and the eye-brain-perception relationship, this book discusses artists' creative processes, tools, and techniques, and offers instruction on how to read art by way of deep-looking.

**A Practical Guide to Painting and Drawing**

Max Johnson

In this day and age, when art has become more of a commodity and art school graduates are convinced that they can only make a living from their work by attaining gallery representation, it is more important than ever to show the reality of how a professional, contemporary artist sustains a creative practice over time. The 40 essays collected here in *Living and Sustaining a Creative Life* are written in the artists' own voices and take the form of narratives, statements and interviews. Each story is different and unique, but the common thread is an ongoing commitment to creativity, inside and outside the studio. Both day-to-day and Big Picture details are revealed, showing how it is possible to sustain a creative practice that contributes to the ongoing dialogue in contemporary art. These stories will inform and inspire any student, young

artist and art enthusiast, and will help redefine what 'success' means to a professional artist.

In a time of declining resources in institutions of higher education, we grapple with how priorities are to be set for the limited resources available. Most vulnerable are those students labeled underprepared by colleges and universities. Should we argue that the limited resources available ought to be used to support these students through their undergraduate years? And, if we decide that we want to do that, what evidence of their potential for success can we provide that will justify the use of these resources? Through longitudinal research that follows students who have been so labeled over all their college years, we can begin to find answers to these questions. Time to Know Them is the first book that follows the experiences of a group of students over their entire academic experience. No previous studies have brought together the factors incorporated in this study: \*examining writing and learning on a true longitudinal basis; \*studying a multicultural urban population; \*investigating the relationship between writing and learning by examining papers written over time for regularly assigned academic courses across a range of disciplines; and \*taking into consideration non-academic factors that influence academic performance such as race, gender, socio-economic status, and ideological orientation. Through interviews twice a semester over six years, the collection of papers written for all courses, observations of instructional settings, and analysis of required institutional tests of writing, the author has been able to pull together a more complete picture of writing and intellectual

---

development over the college years than has previously been available in any study. Students are seen to acquire the ability to handle more complex reasoning tasks as they find themselves in more challenging intellectual settings and where risk-taking and exploration of new ideas are valued. The integration of students' previous life experiences into their academic studies allows them to analyze, critique, modify, and apply their previously held world views to their new learning. These changes are seen to occur over time with instructional settings and support providing key roles in writing development. Personal factors in students' lives present difficulties that require persistence and dedication to overcome. Never before have the complexities of real individual lives as they affect academic performance been so clearly presented.
