How to Write

**Instructions (with
Pictures) - wikiHow**

Each and every instruction in an instruction manual should be clearly separated from any other instruction, for example, by a line or a number or (preferably) both. A table consisting of

instructions, each separated from each other, is ideal. In the first column the number (1., 2., 3. and so on) can find its rightful place.

*How to Write a User

When writing a manual, you need to put on a "user's hat" and think like a user. You should have a good understanding of your users so you can understand the information they need to know, their background, and their knowledge of the product. Once you think like a user, you can write content that the users need to know.
