This book provides guidance to readers for how to conduct an integrative review. Over the decades, with the expansion of evidence-based practice (EBP), the evolution of methods used in reviews

has resulted in a wide spectrum of review types. Due to the overlapping characteristics of the various review methods, confusion exists related to terminology, descriptions and methods of each type. To fill this gap, this book examines components necessary to conduct a rigorous integrative review from formulating questions through dissemination of the results of the review. Each chapter focuses on one component or step in this process and is written in a straightforward and readable

manner. An integrative review is considered by many as an actual research study, hence it should be approached following established research methods involving well-defined steps. The integrative review is often compared with the systematic review. Both are used in healthcare research and follow a systematic process in reviewing literature and developing recommendations, but there are important differences that are addressed in the book. Evidence-based

---

practice (EBP) demands high quality, rigorous evidence for nurse clinicians to make informed decisions with and for their patients. In nursing education, the integrative review is a frequent capstone project for graduate students and forms the basis for many doctoral projects. The Integrative review process should be valid, reliable and transparent and this book provides clear guidelines for writing an integrative review for students, educators, clinicians, and researchers. This book is a useful

addition to courses for both undergraduate and graduate level writers of integrative reviews. In academia, a likely adoption would be in graduate research and research methods courses, and baccalaureate honor courses.

teaching argumentative writing. In his course *Arguing as an Art of Peace*, Barry Kroll uses the open hand to represent an alternative approach to argument, asking students to argue in a way that promotes harmony rather than divisiveness and avoiding conventional conflict-based approaches. Kroll cultivates a bodily investigation of noncombative argument, offering direct pedagogical strategies anchored in three modalities of learning—conceptual-procedural, kinesthetic, and contemplative—and projects, activities, assignments, informal responses, and final papers for students. Kinesthetic exercises derived from martial arts and contemplative meditation and mindfulness practices are key to the approach, with Kroll specifically using movement as a physical analogy for tactics of arguing. Collaboration, mediation, and empathy are important yet overlooked values in communicative exchange. This practical, engaging, and accessible guide for teachers contains clear examples and compelling discussions of pedagogical strategies that teach students not only how to write persuasively but also how to deal with personal conflict in their daily lives.

This volume reviews the exploding religion/spirituality (R/S) and health literature from a population health perspective. It emphasizes the distinctive Public Health concern for promoting health and preventing disease in societies, nations, and communities, as well as individuals. Part I offers a rigorous review of mainstream biomedical and social scientific theory and evidence on R/S-health relations. Addressing key

gaps in previous literature, it reviews evidence from a population health viewpoint, surveying pertinent findings and theories from the perspective of Public Health subfields that range from Environmental Health Sciences to Public Health Nutrition to Health Policy & Management and Public Health Education. In Part II, practitioners describe in detail how attending to R/S factors enhances the work of clinicians and community health practitioners. R/S provides an additional set of

concepts and tools to address opportunities and challenges ranging from behavior and institutional change to education, policy, and advocacy. Part III empowers educators, analyzing pedagogical needs and offering diverse short chapters by faculty who teach R/S-health connections in many nationally top-ranked Schools of Public Health. International and global perspectives are highlighted in a concluding chapter and many places throughout the volume. This book addresses

---

a pressing need for Public Health research, practice and teaching: A substantial evidence base now links religious and spiritual (R/S) factors to health. In the past 20 years, over 100 systematic reviews and 30 meta-analyses on R/S-health were published in refereed journals. But despite this explosion of interest, R/S factors remain neglected in Public Health teaching and research. Public Health lags behind related fields such as medicine, psychology, and nursing, where R/S factors

receive more attention. This book can help Public Health catch up. It offers abundant key resources to empower public health professionals, instructors, and students to address R/S, serving at once as a course text, a field manual and a research handbook.

Capturing the narratives of indigenes, this book presents a unique anthology on global Indigenous peoples' wisdoms and ways of knowing. Covering issues of religion, cultural self-determination, philosophy, spirituality, sacred sites, oppression, gender and the suppressed voices of women, the diverse global contexts across Africa, Asia, the Middle East, North and South America, and Oceania are highlighted. The contributions represent heart-felt expressions of Indigenous peoples from various contexts - their triumphs and struggles, their gains and losses, their reflections on the past, present, and future - telling their accounts in their own voices.

Opening new vistas for understanding historical ancient knowledge, preserved and practiced by Indigenous people for millennia, this innovative anthology illuminates areas of philosophy, science, medicine, health, architecture, and botany to reveal knowledge suppressed by Western academic studies.

human beings. This book provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology, includes scholarly reflection on the integration literature, and surveys five paradigms of possible relationships between psychology and Christianity. Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration. This book is ideal as a textbook for students of psychology and other

behavioral and social sciences (social work, sociology, theology, counseling, pastoral counseling) at both the graduate and undergraduate level. It is also written for the broader readership of psychologists, counselors, pastors, and others who are interested in integration"--Publisher description.

for both courses and publication. Developing the ability to communicate in writing is an essential outcome of nursing programs, particularly at the graduate level. This book is a widely used resource on all aspects of: writing EBP papers, reporting research for use in practice, disseminating the findings of clinical projects and innovations, and preparing manuscripts for publication. The text includes new content that focuses on the dissemination of information in Evidence-

Based Practice (EBP). Varied models of EBP are presented with an emphasis on how to disseminate evidence to different audiences, including how to prepare critical appraisals of research studies with implications for practice, literature reviews and syntheses, and other types of written reports that contribute to EBP.
