offers fresh insights to help you write your very best lyrics. Does any of the following sound familiar? You worry that the lyrics you write just don't deliver their full potential but can't figure out why, even though technically they tick all the right boxes. You have great ideas but your finished lyrics somehow fall short of the emotional impact you wanted and, as a result, your songs get passed over. You have a busy schedule with limited time to write and have wasted too many hours chasing un-writable lyric ideas. You wonder how some professional songwriters always seem to get a particular dynamic in their lyrics, consistently writing songs better than 90% of what you hear on the radio. You are perhaps nervous about going into a pro co-writing session because you fear your ideas aren't worth bringing into the writing room. You know you have so many great titles waiting to be written but haven't found a way of systematically developing them into well-crafted lyrics. After writing an amazing hooky Chorus and a great supporting first Verse, you hit the dreaded wall that is "second verse curse". In Song Maps - A New System to Write Your Best Lyrics, I deliver simple, logical, well-defined solutions to these issues and more: I give you seven well-developed professional templates for you to bring your lyrics to life. I also provide you with a tried and tested process for writing lyrics using Song Maps. And I'll reveal the songwriter's

secret weapon. Much of this book contains new material. This is because, while I enjoyed building a firm foundation of knowledge about the craft from the songwriting programs at Berklee Music School and other sources, I discovered Song Maps afterwards, from my experience as a professional songwriter, writing either on my own or in the writing rooms of Nashville. Having been signed as a staff songwriter at Universal Music Publishing in Nashville, being	nominated and winning awards for my songs including Grammys, Doves and hymn-writing awards, and after spending many years studying thousands of techniques and developing them in my own songwriting and in the writing room, I've had the privilege of teaching the material in this book to hundreds of songwriters and seeing a step change in their writing. I have been blessed to watch them find their authentic voice in writing ideas to their full potential, helping them achieve their	dream to move from writing flat 2D lyrics to fabulous High Definition full-color 3D lyrics. As you assimilate Song Maps into your writing workflow, your songwriting will shift away from tentative, self-conscious, inhibited writing to strong, bold, intentional and vulnerable writing that does full justice to your original ideas, ultimately allowing you to make the impact you deserve as a songwriter. If you implement the simple, easy-to-understand concepts in this book, I promise you

your songs will be better crafted than 90% of the songs you hear on the radio. It will also transform your effectiveness as a co-writer. Importantly, no matter where your songs end up, you will be confident you have written a brilliant lyric and you have served your co-writers well. Let this book help you transform your lyric writing by using Song Maps in your songwriting workflow and take your song ideas to their ultimate potential by writing your best, truly golden, spectacular songs.

Writing Lyrics In A Grid Berklee Press Publications

Among the thousands of great songs that exist, in every possible style and genre, very few are lauded for their lyrics. This guide seeks to elevate the quality of lyrics to match the quality of the song. It offers a structured approach to writing lyrics, from overcoming writer's block to how

to structure a song. It explores the lyrical components of the song, to include the theme, poetic construction, use of English, and song construction. Within those headings the book delves into the more important tools available to the lyricist, such as rhythm, rhyme, imagery, metaphor, and many others. It also addresses some of the pitfalls, like the cliché and the split infinitive. This book is aimed at lyricists of all skill levels, from the beginner to the experienced songwriter. There is something in it for everyone. My personal test of a good lyric is that it stands up well when separated from the music, or even better, without knowledge of the music. That is mainly what this book is

intended to help you achieve.
