Writing Spaces 1 Routledge

Informative, insightful, and accessible, this book is designed to enhance the capacity of graduate and undergraduate students, as well as early career scholars, to write for academic purposes. Fang describes key genres of academic writing, common rhetorical moves associated with each genre, essential skills needed to write the genres, and linguistic resources and strategies that are functional and effective for performing these moves and skills. Fang's functional linguistic approach to academic writing enables readers to do so much more than write grammatically well-formed sentences. It leverages writing as a process of designing meaning to position language choices as the central focus, illuminating how language is a creative resource for presenting information, developing argument, embedding perspectives, engaging audience, and structuring text across genres and disciplines. Covering reading responses, book reviews, literature reviews, argumentative essays, empirical research articles, grant proposals, and more, this text is an all-in-one resource for building a successful career in academic writing and scholarly publishing. Each chapter features crafts for effective communication, authentic writing examples, practical applications, and reflective questions. Fang complements these features with self-assessment tools for writers and tips for empowering writers. Assuming no technical

knowledge, this text is ideal for both non-native and native English speakers, and suitable for courses in academic writing, rhetoric and composition, and language/literacy education.

In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. What is an effective scientist? One who is successful by quantifiable standards, with many publications, citations, and students supervised? Yes, but there is much more. Truly effective scientists need to have influence beyond academia, usefully applying and marketing their research to non-scientists. This book therefore takes an all-encompassing approach to improving the scientist's career. It begins by focusing on writing and publishing - a scientist's most important weapon in the academic arsenal. Part two covers the numerical and financial aspects of being an effective scientist, and Part three focuses on running a lab effectively. The book concludes by discussing the more entertaining and philosophical aspects of being an effective scientist. Little of this material is taught in university, but developing these skills is vital to maximize the chance of being effective. Written by a scientist for scientists, this practical and entertaining book is a must-read for every early career-scientist, regardless of specialty.

Politics and the English Language JHU Press

Named a Best Book of 2018 by New York Magazine, the Washington Post, Publisher's Weekly, NPR, and Time, among many others, this essay collection from the author of *The Queen of the Night* explores how we form identities in life and in art. As a novelist, Alexander Chee has been described as "masterful" by Roxane Gay, "incendiary" by the New York Times, and "brilliant" by the Washington Post. With his first collection of nonfiction, he's sure to secure his place as one of the finest essayists of his generation as well. *How to Write an Autobiographical Novel* is the author's manifesto on the entangling of life, literature, and politics, and how the lessons learned from a life spent reading and writing fiction have changed him. In these essays, he grows from student to teacher, reader to writer, and reckons with his identities as a son, a gay man, a Korean American, an artist, an activist, a lover, and a friend. He examines some of the most formative experiences of his life and the nation's history, including his father's death, the AIDS crisis, 9/11, the jobs that supported his writing — Tarot-reading, bookselling, cater-waiting for William F. Buckley — the writing of his first

novel, Edinburgh, and the election of Donald Trump. By turns commanding, heartbreaking, and wry, *How to Write an Autobiographical Novel* asks questions about how we create ourselves in life and in art, and how to fight when our dearest truths are under attack.
