**Robert's Rules of Order for Deliberative Assemblies** Henry M. Robert There appears to be much needed a work on parliamentary law, based, in its general principles, upon the rules and practice of Congress, and adapted, in its details, to the use of ordinary societies. Such a work should give, not only the methods of organizing and conducting the meetings, the duties of the officers and the names of the ordinary motions, but in addition, should state in a systematic manner, in reference to each motion, its object and effect; whether it can be amended or

debated; if debatable, the extent to which it opens the main question to debate; the circumstances under which it can be made, and what other motions can be made while it is pending. This Manual has been prepared with a view to supplying the above information in a condensed and systematic manner, each rule being either complete in itself, or giving references to every section that in any way qualifies it, so that a stranger to the work can refer to any special subject with safety.

Advanced Accounting In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, "If these civilizations do exist, where is everybody?" Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

Criminology is a booming discipline, yet one which can appear divided and fractious. In this rich and diverse collection of 34 essays, some of the worlds leading criminologists respond to a series of questions designed to investigate the state, impact and future challenges of the discipline: What is criminology for? What is the impact of criminology? How should criminology be done? What are the key issues and debates in criminology today? What challenges does the discipline of criminology face? How has criminology as a discipline changed over the last few decades? The resulting essays identify a series of intellectual, methodological and ideological borders. Borders, in criminology as elsewhere, are policed, yet they are also frequently transgressed; criminologists can and do move across them to plunder, admire, or learn from other regions. While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community. In traversing ideological, political, geographical and disciplinary borders, criminologists bring training, tools and concepts, as well as key texts to share with foreigners. From such exchanges, over time, borders may break down, shift, or spring up, enriching those who take the journey and those who are visited. It is, in other words, in criminologys capacity for and commitment to reflexivity, on which the strength of the field depends.
