Flying Couch, Amy Kurzweil's debut, tells the stories of three unforgettable women. Amy weaves her own coming-of-age as a young Jewish artist into the narrative of her mother, a psychologist, and Bubbe, her grandmother, a World War II survivor who escaped from the Warsaw Ghetto by disguising herself as a gentile. Captivated by Bubbe's story, Amy turns to her sketchbooks, teaching herself to draw as a way to cope with what she discovers. Entwining the voices and histories of these three wise, hilarious, and very different women, Amy creates a portrait not only of what it means to be part of a family, but also of how each generation bears the imprint of the past. A retelling of the inherited Holocaust narrative now two generations removed, *Flying Couch* uses Bubbe's real testimony to investigate the legacy of trauma, the magic of family stories, and the meaning of home. With her playful, idiosyncratic sensibility, Amy traces the way our memories and our families shape who we become. The result is this bold illustrated memoir, both an original coming-of-age story and an important entry into the literature of the Holocaust.

This book encourages health professionals to reconceptualise their practice in the light of the fact that their patients are deteriorating and dying, supporting them in their dichotomous role which involves affirming that person's life whilst acknowledging that that life is ending. Professionals are encouraged to think laterally, to be creative in their use of their core skills, and to use their life skills and experience to change the focus of their interventions. By making these changes, those involved with caring for the dying will be able to address issues related to burnout and feeling de-skilled. The authors share their considerable experience with the reader - what works for both patient and carer/professional when working in this field. By providing workable solutions, they empower those in disempowering situations, such as

when working with terminally ill children and adults. The book is truly holistic and client-centred in its approach, upholding the philosophy of palliative care. Aimed at all who interact with children and adults who have a life-limiting condition or who are dying Offers practical examples of approaches to dilemmas and emotional issues commonly face by those working in palliative care Encourages professionals to think laterally, to be creative in their use of core skills, and to use their life skills and experience to change the focus of their interventions Moves the emphasis away from the medical model to the emotional and spiritual influences on quality of life Offers clear, workable guidelines and demonstrates practical solutions, based on proven theory and experience, to problems encountered on a day-to-day basis by patients and those coming into contact with them
