This IBM® Redbooks
product guide describes
Fabric Vision technology.
The use of virtualization,
flash storage, and
automation tools has
allowed applications and

services to be deployed
faster while shattering
performance barriers. The
unprecedented number of
application and service
interactions has also
increased the complexity,
risk, and instability of
mission-critical operations.
As a result, IT organizations
need flexible storage
networks that can adapt to
dynamic environments and
performance requirements
for high-density
virtualization, flash storage,
and cloud infrastructures. To
achieve Service Level
Agreement (SLA) objectives,
IT administrators also need
new tools that can help
ensure non-stop operations,
quickly identify potential
points of congestion, and
maximize application
performance, while
simplifying administration.
Fabric Vision technology
with IO Insight, an extension
of Gen 6 Fibre Channel,
provides outstanding insight
and visibility across the
storage network with

powerful, integrated
monitoring, management,
and diagnostic tools that
help organizations to simplify
monitoring, increase
operational stability, and
dramatically reduce costs.

The Fourth

International

Conference on

Advanced Data Mining

and Applications

(ADMA 2008) will be

held in Chengdu,

China, followed by

the last three successful ADMA conferences (2005 in Wu Han, 2006 in Xi'an, and 2007 Harbin). Our major goal of ADMA is to bring together the experts on data mining in the world, and to provide a leading international forum for the dissemination of original research results in data mining, including algorithms, software and systems, and different disciplines with potential applications of data mining. This goal has been partially achieved in a very short time despite the young age of the conference, thanks to the rigorous review process insisted upon, the outstanding list of internationally renowned keynote speakers and the excellent program each year. ADMA is ranked higher than, or very similar to, other data mining conferences (such as PAKDD, PKDD, and SDM) in early 2008 by an independent source: c

s-conference-ranking. org. This year we had the pleasure and honor to host illustrious keynote speakers. Our distinguished keynote speakers are Prof. Qiang Yang and Prof. Jiming Liu. Prof. Yang is a tenured Professor and postgraduate studies coordinator at Computer Science and Engineering Department of Hong Kong University of Science and Technology. He is also a member of AAAI, ACM, a senior member of the IEEE, and he is also an associate editor for the IEEE TKDE and IEEE Intelligent Systems, KAIS and WI Journals.
