Taunton's Fine Woodworking
This IBM® Redpaper™ publication gives a
broad understanding of a new architecture of
the IBM Power System E950 (9040-MR9)
server that supports IBM AIX®, and Linux
operating systems. The objective of this paper
is to introduce the major innovative Power

E950 offerings and relevant functions: The IBM
POWER9™ processor, which is available at
frequencies of 2.8 - 3.4 GHz. Significantly
strengthened cores and larger caches. Supports
up to 16 TB of memory, which is four times
more than the IBM POWER8® processor-
based IBM Power System E850 server.
Integrated I/O subsystem and hot-pluggable
Peripheral Component Interconnect Express
(PCIe) Gen4 slots, which have double the
bandwidth of Gen3 I/O slots. Supports
EXP12SX and ESP24SX external disk drawers,
which have 12 Gb Serial Attached SCSI (SAS)
interfaces and support Active Optical Cables
(AOCs) for greater distances and less cable
bulk. New IBM EnergyScale™ technology
offers new variable processor frequency modes
that provide a significant performance boost
beyond the static nominal frequency. This
publication is for professionals who want to
acquire a better understanding of IBM Power
Systems™ products. The intended audience
includes the following roles: Clients Sales and
marketing professionals Technical support
professionals IBM Business Partners
Independent software vendors (ISVs) This
paper expands the current set of Power Systems
documentation by providing a desktop
reference that offers a detailed technical
description of the Power E950 server. This
paper does not replace the current marketing
materials and configuration tools. It is intended
as an extra source of information that, together
with existing sources, can be used to enhance
your knowledge of IBM server solutions.

Books in Print Supplement
Just published in its updated fourth edition, this
highly regarded text explains in clear terms how
and why the best-of-class pump users are
consistently achieving superior run lengths, low
maintenance expenditures, and unexcelled safety
and reliability. Written by practicing engineers
whose working careers were marked by
involvement in all facets of pumping technology,
operation, assessment, upgrading and cost
management, this book endeavors to describe in
detail how you, too, can accomplish optimum
pump performance and low life cycle cost. A new
chapter on breaking the cycle of pump repairs
examines the cost of failures and the defined
operating range of pumps. The authors also
explore mechanical issues, deviations from best
available technology, and preventing problems
with oil rings and constant level lubricators.
Additional topics include bearing housing

protector seals, best lube application practices, lubrication and bearing distress, and paying for value.

American Street Railway Investments

Includes a tenth anniversary issue, dated Nov. 1945.

The Cumulative Book Index

Vol. for 1955 includes an issue with title Product design handbook issue; 1956, Product design digest issue; 1957, Design digest issue.

IBM Power System E980: Technical Overview and Introduction

This IBM® Redpaper™ publication provides a broad understanding of a new architecture of the IBM Power System E980 (9080-M9S) server that supports IBM AIX®, IBM i, and Linux operating systems (OSes). The objective of this paper is to introduce the major innovative Power E980 offerings and relevant functions: The IBM POWER9™ processor, which is available at frequencies of 3.55 - 4.0 GHz.

Significantly strengthened cores and larger caches. Supports up to 64 TB memory. Integrated I/O subsystem and hot-pluggable Peripheral Component Interconnect Express (PCIe) Gen4 slots, double the bandwidth of Gen3 I/O slots. Supports EXP12SX and ESP24SX external disk drawers, which have 12 Gb SAS interfaces and double the existing EXP24S drawer bandwidth. New IBM EnergyScale™ technology offers new variable processor frequency modes that provide a significant performance boost beyond the static nominal frequency. This publication is for professionals who want to acquire a better understanding of IBM Power Systems™ products. The intended audience includes the following roles: Clients Sales and marketing professionals Technical support professionals IBM Business Partners Independent software vendors (ISVs) This paper expands the current set of IBM Power Systems documentation by providing a desktop reference that offers a detailed technical description of the Power E980 server. This paper does not replace the current marketing materials and configuration tools. It is intended as an extra source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.
