Power Sales Manual
Independently Published
A book/CD-ROM guide for developers and administrators who use HP Printer Control Language (PCL) and Hewlett-Packard's LaserJet and DeskJet printers. There is material on physical details of printer operation as well as coverage of features of the latest models such as color printing, Printer Job Language, and HP-GL/2. Emphasis is on PCL operation rather than a collection of escape sequences. The CD-ROM contains a Printer Application Language utility program with C++ source code, examples, and macro definitions for PCL 5 and PCL 3 commands.

Moody's Manual of Investments: American and Foreign Independently Published

For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

The Underground Guide to Laser Printers Financial Times/Prentice Hall

This book was written to familiarize beginners with general theoretical principles, requirements, applications, and processing steps of the Eddy

Covariance method. It is intended to assist in further understanding the method, and provides references such as textbooks, network guidelines and journal papers. It is also intended to help students and researchers in field deployment of instruments used with the Eddy Covariance method, and to promote its use beyond micrometeorology.
