WHAT VALUABLE COMPANY IS NOBODY BUILDING? The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. If you are copying these guys, you aren't learning from them. It's easier to copy a model than to make something new: doing what we already know how to do takes the world from 1 to n, adding more of something familiar. Every new creation goes from 0 to 1. This book is about how to get there. 'Peter Thiel has

built multiple breakthrough companies, and Zero to One shows how.' ELON MUSK, CEO of SpaceX and Tesla 'This book delivers completely new and refreshing ideas on how to create value in the world.'

MARK ZUCKERBERG, CEO of Facebook 'When a risk taker writes a book, read it. In the case of Peter Thiel, read it twice. Or, to be safe, three times. This is a classic.'

NASSIM NICHOLAS TALEB, author of *The Black Swan*

Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and treatment options. In today's healthcare system, patients, physicians, clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patients' medical conditions. Initial National Priorities for Comparative Effectiveness Research(CER) is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions. In this 2009 report, the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER, develops a priority list of research topics, and identifies the necessary requirements to support a robust and sustainable CER enterprise. As part of the 2009 American Recovery and Reinvestment Act, Congress appropriated \$1.1 billion in federal support of CER, reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care. The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field.

Este libro ha pretendido explicar el proceso de montaje de un ordenador describiendo detalladamente cada uno de sus componentes así como los distintos modelos de cada componente que podemos encontrar en el mercado informático actualmente, intentando conseguir que el lector sea capaz de montar un ordenador completo dejándolo listo para funcionar. El otro objetivo de este libro es que el lector sea capaz de instalar uno o varios sistemas operativos en su ordenador, bien basados en Windows o basados en Linux, así como las distintas utilidades que cualquier usuario de un ordenador debería saber instalar y manejar independientemente del uso que se le vaya a dar al ordenador.
