Depending on the applications running at any given time, the HP DL360 G7 will

adjust its performance and help regulate the amount of power your data center is using. With multiple quad or six-core Intel Xeon processors, this refurbished HP server features 18 DIMM slots that supports up to 384GB of registered memory, or 48GB of unbuffered DDR3 memory, to help you complete your memory-intensive tasks.

HP iLO 2 provides multiple ways to configure, update, and operate servers remotely. The HP Integrated Lights-Out 2 User Guide describes these features and how to use them with the browser-based interface and RBSU. Some features are licensed features and may only be accessed after purchasing an optional license.
