Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various 'omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

Highway Maintenance Operations and Research 1991 Sams Publishing

The Record contains 35 papers on highway maintenance operations activities and research results intended to assist maintenance engineers in improving the efficiency and effectiveness of maintenance efforts.

Sarah is growing up fast. She swings on swings, slides down slides, and climbs trees. Whenever she falls, her mother sweeps her up in her arms and soothes away the hurt. Her mother is always there for her-on her first day of school, when she falls in love for the first time, and finally when she leaves home and starts a family of her own. It is then that Sarah realizes what a wonderful gift her mother has given her. As she watches over a daughter of her own, Sarah passes on that gift, helping her child through the trials of growing up with a gentle strength and enduring love. This beautiful testament to the powerful bond between mothers and daughters will move and inspire mothers while reassuring their daughters that they have a special safety net that will never let them down. Anna Strauss was only sixteen-years-old when she was inspired to write this story as a gift for her mother. Now her enchanting story makes a perfect gift to celebrate the special mother/daughter bond on Mother's Day, Graduation Day, and all year round.

The Rice Genetics Collection of past symposia and other selected literature contains nearly 4,400 pages of searchable information on rice genetics and cytogenetics published by the IRRI and its partners since 1964. In addition to the five genetics symposia held at 5-year intervals since 1985, the collection contains classic publications that kicked off significant reporting on these subjects in the early 1960s. This collection is a comprehensive and historical documentation on the subject of rice genetics, spanning 45 years of research and scholarly work. Held in 2005 and published two years later, Rice Genetics V contains 23 chapters from various contributors on topics dealing with rice genetic research, including rice as a model genome for cereal research, structural genomics and resources, developmental biology and gene regulation, applied genetics, and functional genomics and rice improvement. A brief overview of the past five Rice Genetics symposia, spanning the years 1985-2005, is fittingly included at the end. PC Mag

The scientific achievements of the European Geotraverse Committee (EGT) are presented in this unique study of the tectonic evolution of the continent of Europe and the first comprehensive cross section of the continental lithosphere.
