This award-winning and bestselling business handbook for digital transformation is now fully updated and expanded with the latest research and new case studies! Over the last five years, The DevOps Handbook has been the definitive guide for taking the successes

laid out in the bestselling The Phoenix Project and applying them in any organization. Now, with this fully updated and expanded edition, it's time to take DevOps out of the IT department and apply it across the full business. Technology is now at the core of every company, no matter the business model or product. The theories and practices laid out in The DevOps Handbook are tools to be used by anyone from across the organization to create joy and succeed in the marketplace. The second edition features fifteen new case studies, including stories from adidas, American Airlines, Fannie Mae, Target, and the US Air Force. In addition, renowned researcher and coauthor of Accelerate, Nicole Forsgren, PhD, provides her insights through new and updated material and research. With over 100 pages of new content throughout the book, this expanded edition is a must read for anyone who works with technology. **PC Mag**CIA Training Ltd. A survival guide for writers in the real-world, Writing and Designing Manuals, Third Edition has become a standard reference for technical writers and editors. Readable and practical, it addresses all aspects of manual development from choosing a format to writing effective warnings. Not limited to text elements, the manual also provides guidance for designing illustrations to complement the text and underscore the safety warnings. The completely revised and updated Third Edition

includes: Þ Current materials on desktop publishing Þ Alternative media such as videos, CD-ROMs, and on-line help Þ The impact of new technology such as CD-ROMs and digital cameras on manual design and production Þ New regulations for products sold overseas Þ Impact of the Internet on manual design Gone are the days when a manual might be a few pages of typewritten text. Thanks to the advances in computer technology, even tiny companies can produce slick, professional publications. Writing and Designing Manuals, Third Edition guides you through the messy, complex, frustrating, and fascinating business of producing manuals.

The National Household Education Survey
(NHES) is a random digit dial telephone survey
of households developed by the National
Center for Education Statistics. It has been
conducted in 1991, 1993, 1995, and 1996, with
varying components each year. The NHES
91/93/95/96 CD-ROM contains an electronic
codebook (ECB) program that, after being
installed on a personal computer, allows the
user to examine the variables in each of the
NHES data sets as well as create Statistical
Analysis System (SAS) or Statistical Package for
the Social Sciences (SPSS) programs to
generate an extract data file for any of the
NHES data files on the CD-ROM. The files
include the 1991 and 1995 Adult Education
files, the primary and preprimary education
files from 1991, the school readiness and school
safety files from 1993, the 1995 early childhood
program participation file, and the 1996
household and library, parent and family
involvement in education and civic
involvement, youth civic involvement, and adult
civic involvement files. The ECB is a DOS-
based program for IBM-compatible personal
computers. Sections describe its contents and
use, focusing on what can be done with the
ECB and how to do it. Emphasis is on
extracting information from the files. Eight
appendixes provide specific use information and
samples, including SAS and SPSS samples.
