Panchatantra is perhaps the oldest collection of Indian fables still gaining strength and moving ahead. It is believed to have written around 200BC by the great Hindu Scholar Pandit Vishnu Sharma. Panchatantra means the five principles". It is a Nitishastra which means book of wise conduct in life. Panchatantra consists of five books: 1. Mitra Bhedha (The loss of friends); 2. Mitra Laabha (Gaining friends); 3. Kakolukiyam (Crows and owls); 4. Labdhap-ranasam (Loss of gains); and 5. Aparikshitakarakam (Ill-considered actions). The simple stories of Panchatantra have stood the test of time in the modern age of materialism, stressful living and individualism, and aim to guide the young readers on how to attain success in life by understanding human nature. Key Features: Written in simple and lucid language Each story is supplemented by a moral Word meaning for vocabulary building Practice exercise given for better understanding Panchatantra is commonly available in an abridged form for children. It is an ideal book worth going through many times over. Honestly speaking, it is of far more practical importance for elders to read this book since it is they who always come in contact with people having good, doubtful or bad intensions and motives. A must read for students of all age groups. #v&spublishers

2018 4th International Conference on Computing Communication and Automation (ICCCA) Patient-Reported Outcomes in Performance Measurement Patient-reported outcomes (PROs) are measures of how patients feel or what they are able to do in the context of their health status; PROs are reports, usually on questionnaires, about a patient's health conditions, health behaviors, or experiences with health care that individuals report directly, without modification of responses by clinicians or others; thus, they directly reflect the voice of the patient. PROs cover domains such as physical health, mental and emotional health, functioning, symptoms and symptom burden, and health behaviors. They are relevant for many activities: helping patients and their clinicians make informed decisions about health care, monitoring the progress of care, setting policies for coverage and reimbursement of health services, improving the quality of health care services, and tracking or reporting on the performance of health care delivery organizations. We address the major methodological issues related to choosing, administering, and using PROs for these purposes, particularly in clinical practice settings. We include a framework for best practices in selecting PROs, focusing on choosing appropriate methods and modes for administering PRO measures to accommodate patients with diverse linguistic, cultural, educational, and functional skills, understanding measures developed through both classic and modern test theory, and addressing complex issues relating to scoring and analyzing PRO data.

Actually ... I Met Them Jones & Bartlett Learning

Drawn from the 7th Glion Colloquium held in 2009, this volume considers the role of research universities in an innovation-driven global society. Whether in the "old world" of Europe and North

America or in rapidly developing nations, the message is clear: innovation has become the key to prosperity and social well-being in a hypercompetitive global economy. Part I introduces several forms of economic, technological, and social innovation. Part II discusses agents of innovation from the points of view of a research university, industry, and national innovation policies. Part III presents university leaders from long-established and emerging institutions to compare how regional and institutional characteristics shape innovation strategies. Part IV focuses on approaches to innovation at national and institutional levels, including a U.S. approach to energy challenges, the shift of high-tech industry toward open innovation, and the challenges of creating world-class universities. Part V addresses the intellectual character of innovation and its relationship to the university's mission. Today's economy requires not only leadership in innovation but also educated citizens capable of applying technology, talent, and capital in new ways. Institutions of higher learning must collaborate with industry and government to create a climate and culture that enable innovation to thrive.

She's the one woman I'd give anything to forget--and now I'm stuck living with her. I'm making a fresh start in Lake Tahoe, until my stubborn sister decides to move Mira into our cabin. I'll be damned if I move out on Mira's account. Nothing has changed in the years since I last saw Mira. Her tempting body and smart mouth taunt me daily. The only hope I have at keeping my sanity is the knowledge that Mira is hiding something. Sooner or later I'll discover her secret, and knowing her, it'll be damning. But first, I have to ignore the urge to kiss and touch and make Mira mine again. --EXCERPT-- I grab her waist, guiding her back against the shelves. She kisses my cheekbone, nibbles my earlobe. "We can't do this here." That nibble shoots straight to my groin. "I beg to differ. I think we can manage." Once the walls come down, emotions run hot. Episodes from Sikh History V&S Publishers

From 1962 to 1971, the US military sprayed herbicides over Vietnam to strip the thick jungle canopy that could conceal opposition forces, to destroy crops that those forces might depend on, and to clear tall grasses and bushes from the perimeters of US base camps and outlying fire-support bases. Mixtures of 2,4-dichlorophenoxyacetic acid (2,4-D), 2,4,5-trichlorophenoxyacetic acid (2,4,5-T), picloram, and cacodylic acid made up the bulk of the herbicides sprayed. The main chemical mixture sprayed was Agent Orange, a 50:50 mixture of 2,4-D and 2,4,5-T. At the time of the spraying, 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), the most toxic form of dioxin, was an unintended contaminant generated during the production of 2,4,5-T and so was present in Agent Orange and some other formulations sprayed in Vietnam. Because of complaints from returning Vietnam veterans about their own health and that of their children combined with emerging toxicologic evidence of adverse effects of phenoxy herbicides and TCDD, the National Academy of Sciences was asked to perform a comprehensive evaluation of scientific and medical information regarding the health effects of exposure to Agent Orange, other herbicides used in Vietnam, and the various components of those herbicides, including TCDD. Updated evaluations were conducted every two years to review newly available literature and draw conclusions from the overall evidence. Veterans and Agent Orange: Update 2014 is a cumulative report of the series thus far.

Ghosts of Cherry Street India Hamish Hamilton

This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean

manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

2019 International Conference on Document Analysis and Recognition Workshops (ICDARW) Legare Street Press

The book is the compilation of the research work conducted at macro/micro levels by eminent scientists and teachers of the country with diverse specializations. These scientists/teachers have willingly contributed their work in the form of the articles to this volume addressing various dimensions of the food security and livelihood scenario in various states of the country and the country as a whole. The book is most relevant in the present day owing to the fact that the food security and livelihood is the priority issue confronting the country, as also it demonstrates the use of quantitative techniques in estimating demand and supply gaps. The strategies for conservation of the food energies through proper processing and their value addition for enhancing livelihood options has been taken care of. The nutritional demand-supply gaps, malnutrition and other related issues are also addressed comprehensively. The book is expected to serve as a reference material for the researchers, planners and the public representatives for understanding the conceptual frame of livelihood and food security besides devising pragmatic policies in achieving the food security through attainment of livelihood security at macro and micro levels.

In this, the first book in the "Jack's Justice" series, retired Chicago Homicide Detective Jack Handler leads the charge to rescue Angel, a teenage friend of the family. She had been kidnapped by a psychopathic serial killer named William Holmes-Cumberbatch. Jack is joined in the hunt by his daughter Kate (a New York City homicide detective), his two teenage foster boys (Red and Robby), Angel's mother, and Buddy (the boys' golden retriever). During the course of his search Jack uncovers the kidnapers' fiendish secret--a homemade, but very effective, WMD (weapon of mass destruction). These are some of the comments made regarding previous Jack Handler books: Top Shelf Murder Mystery--Riveting. Being a Murder-Mystery "JUNKIE" this book is definitely a keeper ... can't put it down ... read it again type of book ... and it is very precise to the lifestyles in Upper Michigan. Very well researched. I am a resident of this area. His attention to detail is great. I have to rate this book in the same class or better than authors Michael Connelly, James Patterson, and Steve Hamilton. -- ShellDrakeshores Being a Michigan native, I was immediately drawn to this book. Michael Carrier is right in step with his contemporaries James Patterson and David Baldacci. I am anxious to read more of his work. I highly recommend this one -- J. Henningsen A fast and interesting read. Michael ends each chapter with a hook that makes you want to keep reading. The relationship between father and daughter is compelling. Good book for those who like a quick moving detective story where the characters often break the "rules" for the greater good I'm looking forward to reading the author's next book. -- Flower Lady Move over, Patterson, I now have a new favorite author, Jack and his daughter make a great tag team, great intrigue, and diversions. I have a cabin on Sugar Island and enjoyed the references to the locations. I met the author at Joey's (the real live Joey) coffee shop up on the hill, great writer, good stuff. I don't usually finish a book in the course of a week, but read this one in two sittings so it definitely had my attention. I am looking forward to the next installment. Bravo. -- Northland Press

The medical use of marijuana is surrounded by a cloud of social, political, and religious controversy, which obscures the facts that should be considered in the debate. This book summarizes what we know about marijuana from evidence-based medicine â €"the harm it may do and the relief it may bring to patients. The book helps the reader understand not only what science has to say about medical marijuana but also the logic behind the scientific conclusions. Marijuana and Medicine addresses the science base and the therapeutic effects of marijuana use for medical conditions such as glaucoma and multiple sclerosis. It covers marijuana's mechanism of action, acute and chronic effects on health and behavior, potential adverse effects, efficacy of different delivery systems, analysis of the data about marijuana as a gateway drug, and the prospects for developing cannabinoid drugs. The book evaluates how well marijuana meets accepted standards for medicine and considers the conclusions of other blue-ribbon panels. Full of useful facts, this volume will be important to anyone interested in informed debate about the medical use of marijuana: advocates and opponents as well as policymakers, regulators, and health care providers.

Rural Livelihood and Food Security Pearson College Division

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

Science Focus Pearson Educaci ó n

This report aims to gather the lessons learnt on the effects of HIT to costs and benefits that might be of use to organisations looking to develop and implement HIT programmes. This is a difficult exercise considering the multiple factors affecting implementation of an HIT programme. Factors include organisational characteristics, the kinds of changes being put in place and how they are managed, and the type of HIT system. The report finds that barriers to HIT implementation are still substantial but that some progress has been made on reporting the organisational factors crucial for the adoption of HIT.

However, there is a challenge to adapt the studies and publications from HIT leaders (early implementers and people using HIT to best effect) to offer lessons beyond their local circumstances. The report also finds limited data on the cost-effectiveness of HIT.
