Advancing Health Literacy Woodhead Publishing This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO_2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations.

about these works of art as they produce their own. With forty-eight Islamic geometric compositions from around the world to choose from, artists at all skill levels will relish the myriad opportunities to replicate these intricate patterns, or create their own. The workbook's clever design invites the pattern-maker to consider a composition in the book, take a corresponding loose leaf from the back of the book, and figure out which sections of lines to trace to make the composition. Readers will have the unique satisfaction of making patterns appear where previously none were visible. Compositions—including a mix of more familiar geometric compositions and those that have scarcely been documented—are categorized by region and have various levels of complexity, making it possible for beginners to get started and artists or designers to develop their skills. Compositions are sourced from Samarkand, Delhi, Fes, Isfahan, and Cairo, among many others.

Quicksand

The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.
